Common Core Mapping for Grade 8 -  
Online Math Learning

In eighth grade, students make several advances in their algebraic reasoning, particularly as it relates to linear equations. Students extend their understanding of proportional relationships to include all linear equations, and they consider what a “ solution ” looks like when it applies to a single linear equation as well as a system of linear equations.

Grade 8 Module 3: Similarity In  
Module 3, students learn about  
dilation and similarity and apply that  
knowledge to a proof of the  
Pythagorean Theorem based on the  
Angle-Angle criterion for similar  
triangles. The module begins with the  
definition of dilation, properties of  
dilations, and compositions of  
dilations.
