This is the thoroughly revised and updated edition which aims to keep pace with the rapidly increasing information in medical sciences. The text is presented in a simple and lucid manner. It is illustrated with eight colour plates containing 52 figures, computer-drawn figures and photomicrographs. These make the book colourful and the readers can have a better understanding. The book has been divided into eight sections that include: * General bacteriology. * Serology/immunology. * Parasitology. * Systemic bacteriology. * Mycology. * Virology. * Recent advances * Spots. Each practical exercise ends with important questions and their answers which will help the student in preparing for theory, practical and viva voce examinations.

The first comprehensive Indian work on HIV/AIDS, with each contributing author an expert in his/her field of specialisation. It comprehensively covers the issues and complexities of this virus/disease, keeping in view the Indian scenario the social cultural background, constrained financial and infrastructural resources, and the peculiar and distinct HIV strains and opportunistic profile, compared to western countries.

"Microbiology covers the scope and sequence requirements for a single-semester microbiology course for non-majors. The book presents the core concepts of microbiology with a focus on applications for careers in allied health. The pedagogical features of the text make the material interesting and accessible while maintaining the career-application focus and scientific rigor inherent in the subject matter. Microbiology's art program enhances students' understanding of concepts through clear and effective illustrations, diagrams, and photographs. Microbiology is produced through a collaborative publishing agreement between OpenStax and the American Society for Microbiology Press. The book aligns with the curriculum guidelines of the American Society for Microbiology."--BC Campus website.
