An interdisciplinary and quantitative account of human claims on the biosphere's stores of living matter, from prehistoric hunting to modern energy production. The biosphere--the Earth's thin layer of life--dates from nearly four billion years ago, when the first simple organisms appeared. Many species have exerted enormous influence on the biosphere's character and productivity, but none has transformed the Earth in so many ways and on such a scale as Homo sapiens. In *Harvesting the Biosphere*, Vaclav Smil offers an interdisciplinary and quantitative account of human claims on the biosphere's stores of living matter, from prehistory to the present day. Smil examines all harvests--from prehistoric man's hunting of megafauna to modern crop production--and all uses of harvested biomass, including energy, food, and raw materials. Without harvesting of the biomass, Smil points out, there would be no story of human evolution and advancing civilization; but at the same time, the increasing extent and intensity of present-day biomass harvests are changing the very foundations of civilization's well-being. In his detailed and comprehensive account, Smil presents the best possible quantifications of past and current global losses in order to assess the evolution and extent of biomass harvests. Drawing on the latest work in disciplines ranging from anthropology to environmental science, Smil offers a valuable long-term, planet-wide perspective on human-caused environmental change.

This title is directed primarily towards health care professionals outside of the United States. This book provides a practical introduction to and overview of the development and implementation of evidence-based practice. It focuses on how to look for and appraise the available evidence, how to apply the evidence using a variety of approaches and in different organisational contexts, and how to understand different dimensions of personal and organisational change and its ethical components. Numerous examples from practice and case studies clarify theory Very readable writing style and user-friendly format with checklists of key issues Opportunities for reflective learning Update on current policy and regulatory frameworks Role of clinical governance in evidence-based practice considered.

This volume will challenge those involved with health promotion to think more broadly about what 'doing the right thing' and 'doing things right' mean, and to use this thinking to inform their practice. It is, therefore, essential reading for those who are involved in health promotion as part of their practice, health-promotion specialists, managers responsible for purchasing or providing services, and students.

This compelling book retells and revises the story of the German Renaissance and Reformation through the lives of two controversial men of the sixteenth century: the Saxon court painter Lucas Cranach (the Serpent) and the Wittenberg monk-turned-reformer Martin Luther (the Lamb). Contemporaries and friends (each was godfather to the other's children), Cranach and Luther were very different Germans, yet their collaborative successes merged art and religion into a revolutionary force that became the Protestant Reformation. Steven Ozment, an internationally recognized historian of the Reformation era, reprises the lives and works of Cranach (1472-1553) and Luther (1483-1546) in this generously illustrated book. He contends that Cranach's new art and Luther's oratory released a barrage of criticism upon the Vatican, the force of which secured a new freedom of faith and pluralism of religion in the Western world. Between Luther's pulpit praise of the sex drive within the divine estate of marriage and Cranach's parade of strong, lithe women, a new romantic, familial consciousness was born. The "Cranach woman" and the "Lutheran household"--both products of the merged Renaissance and Reformation worlds--evoked a new organization of society and foretold a new direction for Germany.
