This book provides a concise survey of British politics in the postwar era. Now expanded in a new edition, the author extends his exploration of the theme of "consensus" through to the present day, and provides updated further reading.

British Politics since 1945 offers a comprehensive overview of postwar British politics ideal for introductory students and general readers alike. The book balances a narrative of the major events and personalities of the postwar political scene with a critical assessment of the recurrent issues and concerns of political debate. It also analyses the main ideological perspectives operating within party politics since the Second Wolrd War - from the Right, the Centre and the Left - showing how these dominant groups have viewed developments and expressed their ambitions over the last fifty years. Succinct chronological account complemented with critical, thematic assessment of ideas Covers central topic on all introductory politics and postwar history Extensive use of tabular material, and appendices for reference

Bringing the picture right up to date, this sixth edition of the most reliable basic text on recent political history not only discusses domestic policy and politics in particular, but also covers external and international relations. New additions for this edition include: a discussion of 11 September 2001 the Iraq War and after the election of Iain Duncan Smith and Michael Howard as leaders of the Conservative Party immigration, asylum and identity the wedding of Prince Charles and Camilla Parker-Bowles the 2005 election and Blair's standing as Prime Minister the controversy over fox hunting, the Gambling Act and 24-hour drinking the importance of China on the British arena. Established and authoritative, this volume is a crucial text for all students of contemporary British history and politics.

After the fall of its empire, Britain still holds sway

This Seminar Studies title is a succinct study of modern British foreign policy, focusing on the period from 1945 to the present day. Since the end of the Second World War, Britain has been engaged in international conflicts from the Suez Crisis to the Gulf War and has actively sought involvement in transnational and global affairs. Starting with a brief overview of the rise and fall of the British Empire and continuing chronologically with detailed chapters covering the second half of the twentieth century and the beginning of the twenty-first, Alasdair Blair discusses the highs and lows of British foreign policy in an accessible yet analytical manner. Dealing with themes such as the issues triggered by decolonisation and the changing relationship between Britain and Europe, this text considers the pivotal moments in modern Britain 's engagement with the wider world. Included in this title are supporting materials, such as a chronology of important events from 1945, a Who 's Who of key government figures and a collection of relevant primary sources. Thorough yet concise, Britain and the World since 1945 is the ideal resource for students interested in the development of British foreign policy.

This timely new edition of the Longman Companion to Britain since 1945 (compiled by the series editors themselves) provides a wide-ranging compendium of key facts and figures on British history from the start of the landmark Attlee government in 1945 to the final years of the 1990s. The book embraces all major aspects of British history, government and society, reflecting the massive social, political and economic changes that have transformed the face of Britain since the end of the Second World War. Fully revised and updated, this new edition covers the advent of Tony Blair, the electoral victory of New Labour in 1997 and the major constitutional changes currently underway in Britain. This book will be invaluable to anyone interested in the history and politics of post-war Britain - from students and teachers to party activists and lovers of reader-friendly reference books.

This book provides both a comprehensive introduction and a perceptive examination of Britain 's relations with the European Community and the European Union since 1945, combining an historical account with political analysis to illustrate the changing and multifaceted nature of British and European politics. Few issues in British politics since 1945 have generated such heated controversy as Britain 's approach to the process of European integration associated with the European Union. The long-running debate on the subject has not only played a major part in the downfall of prime ministers and other leading political figures but has also exposed major fault-lines within governments and caused deep and rancorous divisions within and between the major political parties. This highly contested issue has given rise to bitter campaigning in the press and between pressure groups, and it has bemused, confused and divided the public at large. Key questions addressed include: Why has Europe had such an explosive impact on British politics? What impelled British policymakers to join the European Community and to undertake one of the radical, if not the most radical, changes in modern British history? What have been the perceived advantages and disadvantages of British membership of the European Union? Why has British membership of the European Union rarely attracted a national consensus? Engaging with both academic and public debates about Britain and the European Union, this volume is essential reading for all students of British history, British politics, and European politics.
