Doctoral Thesis / Dissertation from the year 2014 in the subject Business economics - Operations Research, , course: PhD Commerce, language: English, abstract: This research was carried out with the objective of establishing the challenges faced by small and medium scale entrepreneurs in their efforts to adopt strategic management in their value chains. A review of relevant literature

revealed that strategic management is a very important approach that all businesses need, no matter their size, in order to enhance effectiveness. It is known to support professionalism, profitability and sustainable value addition when applied according to best practice. Quantitative and qualitative approaches to data gathering were applied to enable the researcher to establish a richer picture of the exact situation on the ground. Quantitative data were collected from a sample of 292 respondents while qualitative data were obtained from a sample of 127 key informants and stakeholders. Drawing inspiration from the survival strategies of the chameleon, the researcher postulated the Chameleon Survival Strategy Model for small and medium-scale enterprises. The model

was then used as a benchmark in the analysis of quantitative data, which were treated using the statistical package for the social sciences (SPSS) and qualitative data, which were content analysed. The chameleon survival strategy was used as the standard to assess the extent to which small and medium scale enterprises were compliant with the fundamentals of strategic management as exhibited by the chameleon in its environment. The key findings were that SMEs failed the Chameleon Survival Strategy Model test, based on the overall value of the model ' s index obtained after data analysis. It was observed that SMEs did not practice strategic management and were therefore not consistent with the chameleon survival strategies, outlined in the model ' s seven

attributes. The conclusions drawn, recommendations and implications of the study on Government policy, the work of stakeholders and entrepreneurs, are presented in this document. The conclusions point to the need for Government and stakeholders to revisit their interventions and support programmes targeting entrepreneurs, to include strategic management capacity development. The lack of knowledge and exposure was found to be the key reason for entrepreneurs' failure to embrace strategic management in their operations. It is also recommended that Government and stakeholders carry out constant needs assessment to establish the exact needs of entrepreneurs, which tend to be quite dynamic.

Business Voyages is not a business fairy tale. Much of it really happened. Don't read this book if you are looking for simple answers and magic formulas. Although the book includes some concepts and techniques anyone should know about people and business, it does not promise success. Business Voyages is problem-oriented, presenting some of the problems encountered by the author and others on their business voyages, while explaining tools and processes anyone

can use for analyzing and dealing with inevitable problems that will be encountered in any business world.

Business Voyages is also opportunity-oriented, showing the reader how one might embark on a business venture at the right time and place and enjoy the winnings of a successful voyage.

This volume focuses on new challenges in distributed Information Filtering and Retrieval. It collects invited chapters and extended research contributions from the special session on Information Filtering and Retrieval: Novel Distributed Systems and Applications (DART) of the 4th International Conference on Knowledge Discovery and Information Retrieval (KDIR 2012), held in Barcelona, Spain, on 4-7 October 2012. The main focus of

DART was to discuss and compare suitable novel solutions based on intelligent techniques and applied to real-world applications. The chapters of this book present a comprehensive review of related works and state of the art. Authors, both practitioners and researchers, shared their results in several topics such as "Multi-Agent Systems", "Natural Language Processing", "Automatic Advertisement", "Customer Interaction Analytics", "Opinion Mining". Contributions have been carefully reviewed by experts in the area, who also gave useful suggestions to improve the quality of the volume.

Charlie Wheelan and his family do what others dream of: They take a year off to travel the world. This is their story. What would happen if you quit your life for a year? In a pre-COVID-19 world, the Wheelan family decided to find out; leaving behind work, school, and even the family dogs to travel the world on a modest budget. Equal parts "how-to" and "how-not-to"—and with an eye toward a world emerging from a pandemic—*We Came, We Saw, We Left* is the insightful and often hilarious account of one family ' s gap-year experiment. Wheelan paints a

picture of adventure and connectivity, juggling themes of local politics, global economics, and family dynamics while exploring answers to questions like: How do you sneak out of a Peruvian town that has been barricaded by the local army? And where can you get treatment for a flesh-eating bacteria your daughter picked up two continents ago? From Colombia to Cambodia, *We Came, We Saw, We Left* chronicles nine months across six continents with three teenagers. What could go wrong?
