This is a record of the sign language which served to communicate necessary information without troubling the contemplative silence of the Cistercian order for nearly a millennium. Robert Barakat's training in Cultural Anthropology and his "interest in nonverbal communication, especially sign languages and folk gestures," moved him to spend time with the monks of St. Joseph's Abbey in Spencer, Massachusetts documenting their use of sign.

Cistercian Sign Language Cistercian Studies No 11

A fascinating form of sign language specific to the Order of Cistercians of the Strict Observance, or Trappists, arose out of dissonance between pious devotion to daily times of silence and a nagging necessity for communication in certain situations. This holy little language is still used by some of the older members of Trappist communities.

Cistercian Studies Quarterly began as
an offshoot of Collectanea, a review of
monastic spirituality and history
published under the auspices of the
Cistercian Order of the Strict
Observance (OCSO) since 1934.
Though primarily a French language
publication, for many years
Collectanea included occasional
articles in English.

Cistercian Studies Quarterly :: About

The Cistercian sisters are working to raise \$18 million for a 54,000-square-foot monastery, which will sit on 229 acres in rural Iowa County, southwest of Prairie du Sac.

Surveys key findings and ideas in sign language phonology, exploring the crucial areas in phonology to which sign language studies has contributed.

Although a number of edited collections deal with either the languages of the world or the languages of particular regions or

genetic families, only a few cover sign languages or even include a substantial amount of information on them. This handbook provides information on some 38 sign languages, including basic facts about each of the languages, structural aspects, history and culture of the Deaf communities, and history of research. This information will be of interest not just to general audiences, including those who are deaf, but also to linguists and students of linguistics. By providing information on sign languages in a manner accessible to a less specialist audience, this volume fills an important gap in the literature.

Paralanguage and kinesics define the tripartite nature of speech. Volume 2

Cistercian Sign Language

builds on Poyatos' book No 11

Paralanguage (1993) – reviewed by Mary Key as “the most amplified description of paralanguage available today”. It covers our basic voice components; the many normal or abnormal voice types; the communicative uses of physiological and emotional reactions like laughter, crying, sighing, coughing, sneezing, etc.; and word-like utterances beyond the official dictionary. Kinesics is viewed from interactive, intercultural and cross-cultural, and literary perspectives, with much needed research principles for the realistic study of gestures, manners and postures in their intersystemic links. Applications are given in the social or clinical sciences, intercultural communication, literature, painting, theater and cinema, etc. Related to

both paralanguage and kinesics are the many eloquent sounds produced bodily, by manipulated objects and by the environment. A discussion of silence and stillness as opposed to sound and movement and related to darkness and light, shows their true interactive status, coding, functions, qualifiers, intersystemic co-structurations, positive and negative functions, and cross-cultural attitudes toward silence. The first two volumes are then brought together in a detailed model for studying our interactions with people and the environment, including certain emitting and transmitting congenital or traumatic limitations. 1608 quotations from 133 authors and 216 works vividly illustrate all topics.

The Cistercian Order in Medieval

Europe offers an accessible and 1

engaging history of the Order from its beginnings in the twelfth century through to the early sixteenth century. Unlike most other existing volumes on this subject it gives a nuanced analysis of the late medieval Cistercian experience as well as the early years of the Order. Jamroziak argues that the story of the Cistercian Order in the Middle Ages was not one of a 'Golden Age' followed by decline, nor was the true 'Cistercian spirit' exclusively embedded in the early texts to remain unchanged for centuries. Instead she shows how the Order functioned and changed over time as an international organisation, held together by a novel 'management system'; from Estonia in the east to Portugal in the west, and from Norway to Italy. The ability to adapt and respond to these very

different social and economic conditions is what made the Cistercians so successful. This book draws upon a wide range of primary sources, as well as scholarly literature in several languages, to explore the following key areas: the degree of centralisation versus local specificity how much the contact between monastic communities and lay people changed over time how the concept of reform was central to the Medieval history of the Cistercian Order This book will appeal to anyone interested in Medieval history and the Medieval Church more generally as well as those with a particular interest in monasticism.

always through an interdisciplinary and cross-cultural perspective, this first volume presents culture as an intricate grid of sensible and intelligible sign systems in space and time, identifying the semiotic and interactive problems inherent in intercultural and subcultural communication according to verbal-nonverbal cultural fluency. The author lays out fascinating complexity of our direct and synesthesial sensory perception of people and artifactual and environmental elements; and its audible and visual manifestations through our speaking face, to then acknowledge the triple reality of discourse as verbal language-paralanguage-kinesics, which is applied through two realistic models: (a)for a verbal-nonverbal comprehensive transcription of interactive speech, and (b)for the

Implementation of nonverbal

communication in foreign-language teaching. The author presents his exhaustive model of nonverbal categories for a detailed analysis of normal or pathological behaviors in any interactive or noninteractive manifestation; and, based on all the previous material, his equally exhaustive structural model for the study of conversational encounters, which suggests many applications in different fields, such as the intercultural and multisystem communication situation developed in simultaneous or consecutive interpreting. 956 literary quotations from 103 authors and 194 works illustrate all the points discussed.

In a work with profound implications for the electronic age, Ivan Illich

Download File PDF

Cistercian Sign Language

explores how revolutions in technology affect the way we read and understand text. Examining the Didascalicon of Hugh of St. Victor, Illich celebrates the culture of the book from the twelfth century to the present. Hugh's work, at once an encyclopedia and guide to the art of reading, reveals a twelfth-century revolution as sweeping as that brought about by the invention of the printing press and equal in magnitude only to the changes of the computer age—the transition from reading as a vocal activity done in the monastery to reading as a predominantly silent activity performed by and for individuals.
