Decorate your journal with Ephemera and Stickers You may want that "wrap around" text look, If you do be sure to take stickers and/or ephemera and place them farther into the page so that it overlaps into the writing space. This way, when you write you'll have to write around what you glued down. I like this look very much.

Interactive Notebooks: Science for grade 2 is a fun way to teach and reinforce effective note taking for students. Students become a part of the learning process with activities about plant and animal needs, life cycles, matter, sound, the moon, the water cycle, and more! This book is an essential resource that will guide you through setting up, creating, and maintaining interactive notebooks for skill retention in the classroom. High-interest and hands-on, interactive notebooks effectively engage students in learning new concepts. Students are encouraged to personalize interactive notebooks to fit their specific learning needs by creating fun, colorful pages for each topic. With this note-taking process, students will learn organization, color coding, summarizing, and other important skills while creating personalized portfolios of their individual learning that they can reference throughout the year. Spanning grades kindergarten to grade 8, the Interactive Notebooks series focuses on grade-specific math, language arts, or science skills. Aligned to meet current state standards, every 96-page book in this series offers lesson plans to keep the process focused. Reproducibles are included to create notebook pages on a variety of topics, making this series a fun, one-of-a-kind learning experience.

From Galileo to scientists working on cloning, notebooks have been used to document scientific discovery. Science notebooks are also effective tools in the classroom. They make science experiences more meaningful and authentic for students as they observe, record, and reflect on what they've learned. For time-strapped teachers, notebooks offer a natural way to integrate science and language arts. Brian Campbell and Lori Fulton spent four years investigating the use of science notebooks by students, teachers, and practicing scientists. This book not only details what they learned, it serves as a ready resource of strategies and methods for teachers to incorporate science notebooks into their school day. Along the way, the book intersperses additional help: Classroom vignettes demonstrate how science notebooks actually function in class. Student samples allow readers to see student entries at a variety of levels. Thinking points throughout link ideas presented in the book to practice and philosophical beliefs. Connections to standards--both the National Science Education Standards and the Standards for the English Language Arts - reinforce the rationale for using science notebooks to develop scientific concepts AND literacy. Use science notebooks and watch as your students write as scientists do, share their thinking, support their ideas with evidence, and improve their literacy through reading, writing, and speaking.

Glazed bricks applied as a new form of colourful and glossy architectural decor first started to appear in the early Iron Age on monumental buildings of the Ancient Near East. This volume provides an updated overview of the development of glazed bricks and scientific research on the topic.
