National Geographic Explorer and TED Prize-winner Dr. Sarah Parcak welcomes you to the exciting new world of space archaeology, a growing field that is sparking extraordinary discoveries from ancient civilizations across the globe. In Archaeology from Space, Sarah Parcak shows the evolution, major discoveries, and future potential of the young field of satellite archaeology. From surprise advancements after the declassification of spy photography, to a new map of the mythical Egyptian city of Tanis, she shares her field's biggest discoveries, revealing why space archaeology is not only exciting, but urgently essential to the preservation of the world's ancient treasures. Parcak has worked in twelve countries and four continents, using multispectral and high-resolution satellite imagery to identify thousands of previously unknown settlements, roads, fortresses, palaces, tombs, and even potential pyramids. From there, her stories take us back in time and across borders, into the day-to-day lives of ancient humans whose traits and genes we share. And she shows us that if we heed the lessons of the past, we can shape a vibrant future. Includes Illustrations

Incorporating the latest scholarship, this upper-level ancient history text guides students through the process of historical inquiry and exploration. Covering topics ranging from the need for water in ancient societies to the problem of ancient suicide, this narrative presents a balanced, cultural approach within a chronicle of historical events and evidence, thereby promoting critical thinking, sharpening analytical skills, and building student interest. This text offers a unique, multi-part pedagogical framework. Each chapter is organized by "The Problem," "Sources and Method," "The Evidence," "Questions to Consider," and the "Epilogue." Diverse primary source materials include documents, maps, art, city plans, and statistical data. At the end of each chapter, the central theme, or "problem," is tied to contemporary issues.
