Drawing on the latest brain research, compelling stories from his psychological practice, and colorful examples of counterintuitive success from sports, business, education, and the arts, neuroscientist Srini Pillay, M.D., challenges traditional ideas about productivity, revealing the lasting, positive benefits of adding deliberate and regular unfocus to your repertoire. Tinkering with ideas and with things releases your mind to wander from a state of stuckness into a possibility frame of mind, triggering neural connections and new insights. Doodling can help you tap into another brain frequency to remove obstacles and create opportunities and inspiration. With techniques for training the brain to unfocus, concepts for scheduling busy lives, and ideas for controlling this new cognitive-toggling capability, *Tinker Dabble Doodle Try* will change how you think about daydreaming, relaxing, leaving work unfinished, and even multitasking. What you'll discover is a greater freedom, a deeper intelligence, and a more profound joy in your life.
