Educational Psychology: Windows on Classrooms, Ninth Edition, will help you increase student learning and development. It is the most applied book in the field. If you're looking for a book that gives you a sound theoretical and research-based foundation and then provides specific and concrete illustrations

and guidelines for applying this theory and research with your students, this is the book for you. The book uses an integrated-case approach. Each chapter begins with a case study taken from actual classroom practice. But, instead of stopping there, Eggen and Kauchak then weave the case throughout each chapter--extracting specific illustrations from it, and in some instances even taking dialogue from the lesson--to illustrate classroom applications of sometimes abstract and hard to understand theory and research.

The first book of its kind, "Essentials of Educational Psychology" focuses squarely on the core concepts, principles, and underlying assumptions of the field of educational psychology--the big ideas of ed psych. Because of this focus and the book's exceptionally direct and clear presentation, "Essentials" is a 10 chapter book that can truly be covered and understood in a term. It is a book that enables and empowers students to understand the value and essential importance of educational psychology to becoming a qualified and quality teacher. What instructors and students who have used "Essentials" say about the text: "I have had many students each term tell me that this is the most readable and practical textbook they have ever read. . . .["Essentials"] is something that [Ormrod] wrote after considering her students' needs! This comes out in the writing style but in a way that also maintains the rigor of the content and uses the most recent understandings in the field"Mark J. SzymanskiPacific University "This text creates an integrated and engaging narrative that adeptly weaves theories and concepts of learning, motivation, and development into classroom teaching. . . .Not only is the text a pleasure to read, but it is also a pleasure to teach using this text. . . .This format is sensitive to the length of semesters, and frees instructors from rushing from one chapter to the next or covering multiple chapters in a single week. As such, instructors have greater flexibility to explore the topics with students." Cecil RobinsonThe University of Alabama "Other texts present information that is often bogged down with dry descriptions of research and abstract concepts. Ormrod has an outstanding ability to make content accessible to and interesting for undergraduate students. . . .Also, examples and suggestions are clearly related to chapter content and helpful for tying content to actual classroom practice. We recommend that students keep this textbook because it will be a useful reference for them when they actually begin teaching."Rhoda CummingsUniversity of Nevada, Reno "I have found no other textbook author who prepares adolescent behavior and development, child behavior and development, or beginning educational psychology texts...as clearly as Ormrod."William M. GrayUniversity of Toledo

The second Canadian edition of Health Psychology: Biopsychosocial Interactions integrates multidisciplinary research and theory to help students understand the complex connections between psychology and health. This comprehensive yet accessible textbook covers the biopsychosocial factors that impact human health and wellness, placing particular emphasis on the distinctive characteristics of the Canadian health care system, the issues and challenges unique to Canadian culture, and the most recent Canadian research in the field of health psychology. Clear, student-friendly chapters examine topics such as coping with stress and illness, lifestyles for enhancing health and preventing illness, managing pain and discomfort, getting medical treatment, and living with chronic illness. This fully revised second edition features the latest available data and research from across Canada and around the world. New and expanded chapters explore psychosocial factors in aging and dying, legalized marijuana use in Canada, the link between inflammation and depression, Canadian psychosocial models of pain, recent Medical Assistance in Dying (MAiD) legislation, weight control, eating disorders, and exercise, and much more. Throughout the text, updated illustrative examples, cross-cultural references, and real-world cases reinforce key points and strengthen student comprehension, retention, and interest.

They find it easy to read, interesting and engaging. . . . This textbook's major strengths are its cognitive perspective, its readability, and the fact that it puts into practice some of the information-processing strategies that it teaches as effective ways to process information. . . ." --Elizabeth Pemberton, University of Delaware "[T]he text is written in a . . . conversational style that invites students to actively explore complex questions about teaching and learning. It is well-organized, supported with visual aids, and various learning tools, such as guidelines, reflection activities, and cases presenting opposing viewpoints. Most importantly, the text is informed and well supported by contemporary scholarship in the field of educational psychology." --Alina Reznitskaya, Montclair State University

This edition examines the philosophical, historical and methodological foundations of psychological testing, assessment and measurement, while helping students appreciate their benefits and pitfalls in practice.
