Textbooks are symbols of centuries-old education. They're often outdated as soon as they hit students' desks. Acting "by the textbook" implies compliance and a lack of creativity. It's time to ditch those textbooks--and those textbook assumptions about learning In Ditch That Textbook, teacher and blogger Matt Miller encourages educators to throw out meaningless, pedestrian teaching and learning practices. He empowers them to evolve and improve on old, standard, teaching methods. Ditch That Textbook is a support system, toolbox, and manifesto to help educators free their teaching and revolutionize their classrooms.

Rethinking Progress provides a challenging reevaluation of one of the crucial ideas of Western civilization; the notion of progress. Progress often seems to have become self-defeating, producing ecological deserts, overpopulated cities, exhausted resources, decaying cultures, and widespread feelings of alienation. The contributors, from all over the world, present their diversified perspectives on the fate of progress.

Ever since its first publication in 1992, The End of History and the Last Man has provoked controversy and debate. Francis Fukuyama's prescient analysis of religious fundamentalism, politics, scientific progress, ethical codes, and war is as essential for a world fighting fundamentalist terrorists as it was for the end of the Cold War. You're holding a new kind of professional development tool called a Strategic Teacher PLC Guide. Designed in partnership with more than 75 schools, Strategic Teacher PLC Guides make the important work of bringing high-impact, research-based instructional practices into every classroom easier than ever before. Each guide focuses on one strategy from the best-selling ASCD book The Strategic Teacher: Selecting the Right Research-Based Strategy for Every Lesson and serves as a complete professional development resource for a team of teachers (or professional learning community) to learn, plan, and implement the strategy in their classrooms. This guide focuses on Reading for Meaning, a reading and reasoning strategy that helps students understand new ideas, make inferences, and support their thinking with evidence. The strategy is designed around research showing that proficient readers use a specific set of thinking skills to build deep understanding of the texts they read and apply those skills in three distinct phases: before reading, during reading, and after reading. Reading for Meaning gives all students the opportunity to practice this three-phase approach by* Using simple statements to preview and predict before reading.* Actively searching for relevant evidence during reading.* Reflecting on and synthesizing both their learning and their thinking process after reading. This PLC Guide takes you and your colleagues on a "guided tour" of Reading for Meaning, enabling you to* Learn how Reading for Meaning builds reading, reasoning, and problem-solving skills.* Experience a model lesson using the Reading for Meaning strategy and learn from sample lessons and planning forms designed by other teachers.* Plan a complete Reading for Meaning lesson for your classroom.* Reflect deeply on your lesson to refine and expand your use of the strategy.* Examine student work at various levels of proficiency and use your findings to plan next steps in building students' reading, thinking, and comprehension skills.
