In the first, investigations of the primary drivers of diversity, namely terpenoid synthase (TS) and cytochrome P450s (CYPs), identified different evolutionary routes in which either (i) microsyntenic blocks of TS/CYPs duplicate and provide templates for the evolution of new pathways, or (ii) new pathways arise by mixing and matching of individual TS and CYPs .

Biology: Exploring the Diversity of Life is uniquely designed for today's Canadian biology student. The intention of this introductory biology' text is to capture students' imaginations and evoke a sense of curiosity about the vast world of biology. To facilitate immediately immersing students in biology, the text puts the review of chemistry and biochemistry in a distinct section called the Purple Pages, to be easily referenced when needed. The authors have taken great care to encourage critical thinking and learning with engaging visuals and by integrating the material across the book's chapters. With a focus on the Canadian biology student, the text approaches the material with a readable style that instills a sense of wonder by using examples from across the spectrum of biodiversity, showcasing Canadian research and innovation, and highlighting an array of career options that stem from biology. The text engages students in the science and future of biological science with effective pedagogy, streamlined content, a comprehensive MindTap, and a focus on research and experimentation that creates a complete biology learning solution.

Biology: Exploring the Diversity of Life covers all the core concepts professors need their students to master before going on to upper level courses in a concise and accessible fashion. It also gives the historical precedent for all that we know now, as well as providing information on current research and modern molecular tools that have allowed us to ask and answer questions we never thought possible 10 years ago. The final piece of the puzzle and also the most unique feature is that, through the "Unanswered Questions" box, the text gives students a perspective on what researchers are working on for the future and what the impact will be to the world when these discoveries are made. Biology: Exploring the Diversity of Life goes beyond what normal Biology textbooks have done. Not only has it been designed with the Canadian student in mind but it has been built with the help of Canadian students. With new features such as "Molecule Behind Biology", "People Behind Biology" and "Life on the Edge", Canadian students will enjoy learning Biology and instructors will enjoy teaching it.

This classic by the distinguished Harvard entomologist tells how life on earth evolved and became diverse, and now, how diversity and life are endangered by us, truly. While Wilson contributed a great deal to environmental ethics by calling for the preservation of whole ecosystems rather than individual species, his environmentalism appears too anthropocentric: "We should judge every scrap of biodiversity as priceless while we learn to use it and come to understand what it means to humanity." And: "Signals abound that the loss of life's diversity endangers not just the body but the spirit." This reprint of the 1992 Belknap Press publication contains a new foreword. Intuitively, organisations can easily be categorised as ' public ' or ' private ' . However, this book questions such a black and white dichotomy between public and private, and seeks a deeper understanding of hybrid organisations. These organisations can be found at micro, meso and macro levels of societal activity, consisting of networks between companies, public agencies and other entities. The line between these two realms is increasingly blurred — giving rise to hybrid organisations. Governing Hybrid Organisations presents an engaging discussion around hybrid organisations, highlighting them as important and fascinating examples of modern institutional diversity. Chapters examine the changing landscape of service delivery and the nature and governance of hybrid organisations, using international examples and cases from different service contexts. The authors put forward a clear analytical framework for understanding hybrid governance, looking at strategy and performance management. This text will be valuable for students of public management, public administration, business management and organisational studies, and will also be illuminating for practising managers.

Biodiversity has become a buzzword in the environmental movement and in science, and is increasingly being taught in university degree courses. This new text is designed as a primer, giving non-specialists an introduction to the historical context, current debates, and ongoing research in this subject.

Explores how binary gender and behaviours of gender were actively challenged in classical antiquityProvides a focus on gender on its own terms and outside the context of sex and sexuality Offers an interdisciplinary approach, appealing to Classicists, Ancient Historians, and Archaeologists, as well as audiences working outside the ancient world, in Gender Studies, Transgender Studies, LGBTQ+ Studies, Anthropology, and Women's StudiesCovers a broad time period (6th c. BCE - 3rd c. CE) and addresses both textual evidence and material culture (vases, sculpture, wall painting)Provides history of gender identities and behaviours previously ignored or suppressed by disciplinary practicesGender identity and expression in ancient cultures are questioned in these 15 essays in light of our new understandings of sex and gender. Using contemporary theory and methodologies this book opens up a new history of gender diversity from the ancient world to our own, encouraging us to reconsider those very understandings of sex and gender identity. New analyses of ancient Greek and Roman culture that reveal a history of gender diverse individuals that

has not been recognised until recently. Taking an interdisciplinary approach these essays will appeal to classicists, ancient historians, archaeologists as well as those working in gender studies, transgender studies, LGBTQ+ studies, anthropology and women's studies.
