Trials produce maturity, and this is why they are a blessing to us. James 1:4 describes a progression where trials produce perseverance, and perseverance, maturity. The goal of trials is not to make a person more persevering. That ' s not a very exciting goal. But the result of persevering under trials is a mature character and faith.

While such historic monuments as the pyramids at Giza, the Karnak Temple, and the Valley of the Kings draw visitors to Egypt each year, the country is today a large and varied collection of some 79 million people. An important political and cultural force in the Middle East and home to one of Africa's most advanced economies, Egypt is rapidly becoming a major player in the 21st-century world. This comprehensive text examines all facets of life in Egypt, including its land, history, politics, and culture. It is written in a manner that makes the subject accessible and engaging for readers with little prior knowledge about the country, but also provides a critical analysis of the latest research for students and scholars familiar with Egypt and its people. Special attention is given to the historical period following the rise of Islam to enable a greater understanding of Egypt's contemporary government, religious practices, popular culture, and current events.

Family remains the most powerful social idiom and one of the most powerful social structures throughout the Arab world. To engender love of nation among its citizens, national movements portray the nation as a family. To motivate loyalty, political leaders frame themselves as fathers, mothers, brothers, or sisters to their clients, parties, or the citizenry. To stimulate production, economic actors evoke the sense of duty and mutual commitment of family obligation. To sanctify their edicts, clerics wrap religion in the moralities of family and family in the moralities of religion. Social and political movements, from the most secular to the most religious, pull on the tender strings of family love to recruit and bind their members to each other. To call someone family is to offer them almost the highest possible intimacy, loyalty, rights, reciprocities, and dignity. In recognizing the significance of the concept of family, this state-of-the-art literature review captures the major theories, methods, and case studies carried out on Arab families over the past century. The book offers a country-by-country critical assessment of the available scholarship on Arab families. Sixteen chapters focus on specific countries or groups of countries; seven chapters offer examinations of the literature on key topical issues. Joseph ' s volume provides an indispensable resource to researchers and students, and advances Arab family studies as a critical independent field of scholarship.

Recreate and analyze some of the wildest murder trials on the American frontier.

With contributions by internationally reputed researchers in the field, this book presents the implications of the genomic revolution for conifers—promoting a better understanding of the evolution of these organisms as well as new knowledge about the molecular basis of quantitative trait variation. Both of these discoveries play important roles in their domestication. Topics include cytogenetics, patterns of nucleotide diversity, genetic mapping, integration of molecular markers in breeding, transcriptomics, advances in proteomics and metabolomics in gymnosperms, and economic importance.
