This New American Red Cross CPR/AED for the Professional Rescuer Participant's Manual and course reflect changes based on the 2005 Consensus on Science for CPR and Emergency Cardiovascular Care (ECC) and the Guidelines 2005 for First Aid. Changes to this program and manual include simplifications to many of the CPR skill sequences, which helps improve retention. There have also been changes to help improve the quality of CPR. The integration of CPR skills into the operation of AEDs had changed to help improve survival from sudden cardiac arrest. Professional rescuers are now trained to use AEDs on adults and children. Information has been updated and added to this program to help professional rescuers administer epinephrine, aspirin and fixed-flow-rate oxygen. The skills learned in this course include adult, child and infant rescue breathing, conscious and unconscious choking, CPR, two-rescuer CPR and adult and child AED. Additional training can be added to this course including bloodborne pathogens training and emergency oxygen administration. While the skills and knowledge that professional rescuers use are increasing, this training will help you meet your most important responsibility as a professional rescuer- the responsibility to save lives.

Product 15-1064

Part of a series of titles authored by the National Safety Council, First Aid: Taking Action covers the material required for a semester long Advanced First Aid course . The focus is teaching how to recognize and act in any emergency and to sustain life until professional help can arrive. Other information includes bleeding control, and first aid for sudden illnesses and injuries. Information is presented in a concise easy-to-read manner that works as a handy reference after the course. National Safety Council programs and products are designed to benefit all types of learning styles by combining lectures, video presentations, group discussions, and hands-on training.

Topics covered in 'First Aid, CPR, and AED Standard' include current CPR and ECC guidelines, core information for first aiders, explanations and visual summaries of important skills, decision-making processes, and appropriate procedures.
