When the war ended on August 15, 1945, I was a naval engineering cadet at the Kure Navy Yard near Hiroshima, Japan. A week later, I was demobilized and returned to my home in Tokyo, fortunate not to find it ravaged by firebombing. At the beginning of September, a large contingent of the American occupation forces led by General Douglas MacArthur moved its base from Yokohama to Tokyo. Near my home I

watched a procession of American military motor vehicles snaking along Highway 1. This truly awe-inspiring cavalcade included jeeps, two-and-a-half-ton trucks, and enormous trailers mounted with tanks and artillery. At the time, I was a 21-year-old student in the Machinery Section of Engineering at the Tokyo Imperial University.

Watching that magnificent parade of military vehicles, I was more than impressed by the gap in industrial strength between Japan and the U. S. That realization led me to devote my whole life to the development of the Japanese auto industry.

I wrote a small article concerning this incident in Nikkei Sangyo Shimbun (one of the leading business newspapers in Japan) on May 2, 1983. The English translation of this story was carried in the July 3, 1983 edition of the Topeka Capital-Journal and the September 13, 1983 issue of the Asian Wall Street Journal. The Topeka Capital-Journal headline read, "MacArthur's Jeeps Were the Toyota Catalyst."

Some 75 articles drawn from four Continents trace the progress of Datsun's highly competitive 240Z and 280Z coupes between 1970 and

1978. Included are road, track, comparison and long-term tests, new model introductions and updates together with full specifications and performance data. Also featured are articles on tuning and racing, plus advice is offered on acquiring a good pre-owned 240Z or 260Z.

Unmatched performance and a fantastic variety of cars and competitors made IMSA's Grand Touring Prototypes the most exciting sports-car racing series ever.

Innovative technology and cutting-edge aerodynamics made GTP cars the fastest,

most powerful road-course racers from 1981 to 1993. But GTP wasn't just about machinery. The cars were a reflection of the people who designed and raced them, who were every bit as diverse and intriguing as their vehicles. The series attracted competitors from every corner of the racing world. Privateers -- wealthy gentleman racers who made fortunes in careers that included radio broadcasting, trash collection, and even drug smuggling -- competed against professional drivers who had won Le Mans and other major races. Prototypes is the first complete history of this remarkable

series. Through candid interviews with team principals, drivers, and race organizers, this team-by-team account unflinchingly tells the stories of the men and women who raced these cars: their successes, their failures and the reasons why. Illustrated with behind-the-scenes team photos and supported by full race results, Prototypes is an intimate look at the last Golden Age of sports-car racing.
