The field of gerontology has often been criticized for being "data-rich but theory-poor." The editors of this book address this issue by stressing the importance of theory in gerontology. While the previous edition focused on multidisciplinary approaches to aging theory, this new edition provides cross-disciplinary, integrative explanations of aging theory: The contributors of this text have reached beyond traditional disciplinary boundaries to partner with researchers in adjacent fields in studying aging and age-related phenomena. This edition of the Handbook consists of 39 chapters written by 67 internationally recognized experts in the field of aging. It

contains 35 chapters by the most highly respected luminaries in the field. It addresses theories and concepts built on cumulative knowledge in four disciplinary areas- biology, psychology, social sciences, and policy and practice- as well as landmark advances in trans-disciplinary science. With its explicit focus on theory, the handbook is unique in providing essential knowledge about primary explanations for aging, spanning from cells to societies. The chapters in the third edition place a strong emphasis on the future of theory development, assessing the current state of theories and providing a roadmap for how theory can shape research, and vice versa, in years to come. Many chapters also address connections between theories and policy or practice. Each set of authors has been asked to consider how theories in their area address matters of diversity and inequalities in

If today students of social theory read Jurgen Habermas, Michel Foucault and Anthony Giddens, then proper regard to the question of culture means that they should also read Raymond Williams, Stuart Hall and Slavoj Zizek. and cultural theory, and in so doing offers a novel agenda for social and cultural research in the twenty-first century. This Handbook, edited by Anthony Elliott, develops a powerful argument for bringing together social and cultural theory more systematically than ever before. Key social and cultural theories, ranging from classical approaches to postmodern, psychoanalytic and post-feminist approaches, are drawn together and critically appraised. There are substantive chapters looking at – among others – structuralism and post-structuralism, critical theory, network analysis, feminist cultural thought, cultural theory and cultural sociology. Throughout the Handbook there is a strong emphasis on interdisciplinarity, with chapters drawing from research in sociology, cultural studies, psychology, politics, anthropology, women ' s studies, literature and history.

Drawing on a range of approaches from the social sciences and humanities, this handbook explores theoretical and empirical perspectives that address the articulation of law in society, and the social character of the rule of law. The vast field of socio-legal studies provides multiple lenses through which law can be considered. Rather than seeking to define the field of socio-legal studies, this book takes up the experiences of researchers within the field. First-hand accounts of socio-legal research projects allow the reader to engage with diverse theoretical and methodological approaches within this fluid interdisciplinary area. The book provides a rich resource for those interested in deepening their understanding of the variety of theories

The chapters consider multiple disciplinary lenses – including feminism, anthropology and sociology – as well as a variety of methodologies, including: narrative, visual and spatial, psychological, economic and epidemiological approaches. Moreover, these are applied in a range of substantive contexts such as online hate speech, environmental law, biotechnology, research in post-conflict situations, race and LGBT+ lawyers. The handbook brings together younger contributors and some of the best-known names in the socio-legal field.
