The Human Drift
By Jack London
The Human Drift
is a work of
Utopian social

accessible to
the general
public. The aim
of our
publishing
program is to
facilitate rapid
access to this
vast reservoir
of literature,
and our view is
that this is a
significant
literary work,

Online Library

each title has
been
meticulously
hand curated by
our staff. Our
philosophy has
been guided by a
desire to
provide the
reader with a
book that is as
close as
possible to

Gillette wrote. [2]Gillette's city was to possess "a perfect economical system of production and distribution," run by the United Company; it would in fact be the only city on the North

continent.

Economies of scale would mean that a single one of every necessary facility - one steel mill, one shoe factory, etc. - would exist. Advances in mechanization would generate

Online Library

Human Drift

ever-greater
efficiencies,
and ever-greater
wealth for the
whole society.
Social progress
would be natural
and inevitable;
gender equality
would be the
rule. Gillette
gives a highly
specific picture
of his

metropolis: it
is shaped in a
perfect
rectangle, 135
miles on the
long side and 45
on the short.
Even with
necessary
farming and
mining, most of
the rest of
North America
outside

Online Library

Metropolis would be a natural environment.

Gillette saw the city as containing the full population of the United States at that time, sixty million people; he also thought that the city could accept

Online Library

Human Drift

another thirty
million in
future

population
growth. Gillette
wanted the
buildings of
Metropolis to be
built of
porcelain, for
endurance and
cleanliness.

(His thinking on
this point may

Online Library

Human Drift

have been
influenced by
the famous
"White City" of
the World's
Columbian
Exposition of
1893.) Gillette
favored circular
buildings, even
for residences
(25-floor
apartment
complexes), and

Online Library

Human Drift

a hexagonal

street

plan. (Though the

details of his

plan were highly

specific,

Gillette was not

rigidly

committed to

them; in a

future revised

version he would

switch to a

circular shape

Online Library

Human Drift

for his city,
and raise the
apartment
buildings to 50
stories.) The
text of The
Human Drift was
accompanied with
abundant
illustrations
and plans, a
graph of the
"Educational and
Industrial

Pyramid," and other features of Gillette's scheme." His book is important for the attention it received in its time," though today it is "a curiosity."... John Griffith

Bringing

utopian works

that mark

important points

in the history

and an evolution

in social and

political

philosophies,

this book not

only reflects on

the texts and
their political
philosophy and
implications,
but also, their
architecture and
how that
architecture
informs the
political
philosophy or
social agenda
that the author
intended. Each

of the ten

authors

expressed their

theory through

concepts of

community and

utopian

architecture,

but each

featured an

architectural

solution at the

centre of their

social and

political

philosophy, as
none of the

cities were ever
built, they have
remained as
utopian

literature. Some
of the works
examined are
very well-known,
such as Tommaso
Campanella's
Civitas Solis,

while others
such as Joseph
Michael Gandy's
Designs for
Cottages, are
relatively
obscure.

However, even
with the best
known works,
this volume
offers new
insights by
focusing on the

Architecture of
the cities and
how that
architecture
represents the
author's
political
philosophy. It
reconstructs the
cities through a

sections,
elevations and
perspectives are
presented for
each of the
cities. The ten
cities are:

Albrecht Dürer -

Utopia; Tommaso

Campanella - The

Johann Valentin

Although these
ten cities
represent over
500 years of
