UBS analyzed residential property prices in 25 major cities around the world. According to the study, five European cities as well as Toronto and Hong Kong are in bubble risk territory. Despite the current global recession, on average, inflation-adjusted house price growth in these 25 cities accelerated in the last four quarters, which we consider unsustainable.

investment ever written. Now, this bible for long-term investing continues its tradition with a fourth edition featuring updated, revised, and new material that will keep you competitive in the global market and up-to-date on the latest index instruments. Wharton School professor Jeremy Siegel provides a potent mix of new evidence, research, and analysis supporting his key strategies for amassing a solid portfolio with enhanced returns and reduced risk. In a seamless narrative that incorporates the historical record of the markets with the realities of today's investing environment, the fourth edition features: A new chapter on globalization that documents how the emerging world will soon overtake the developed

This sweeping, comparative study of taxation in the United States and Australia shows that even as governments in the Western world have become increasingly sophisticated tax collectors, a competitive and ruthless market in advice on tax avoidance has developed. The same competitive forces in the late twentieth century which have driven down prices and sparked efficiencies in the production of fast food or computer parts have helped

stimulate the markets for bads like tax shelters and problem gambling. Braithwaite draws the surprising conclusion that effective regulation could actually flip markets in vice to markets of virtue. Essential reading for anyone involved in policy, governance, and regulation, *Markets in Vice, Markets in Virtue* provides a blueprint for restoring the equity of Western tax systems and a breakthrough theory of how regulators can support markets in virtue and curtail markets in vice.

In the present stage of integration, private and public market integration is really what the European Community is all about. A stable security setting itself, in part, a result of European integration - and cooperative politics in Western Europe have enabled the creation and maintenance of an elaborate legal system and common institutions facilitating the unification of product markets throughout the Community. Of course, the pervasive and incessant politicisation of Community decision-making at the Ministerial level tends to diminish attention for what actually happens in the Community industrial markets, while also obscuring its profound economic

impact on European society. It is precisely from the fascination with this vivid 'core' of the European Community that this book has arisen. I have attempted to combine empirical economic analysis, and a minimum of institutional description, with economic theory. Access to theory has been facilitated by the avoidance of algebraic tools, employing - only where necessary - geometric tools. In combining the analytical traditions of international and industrial economics, linked to a fairly detailed institutional economics of legal arrangements and competences at the EC level, it is hoped to provide the relevant tools to comprehend the industrial Euromarkets.
