Charting his meteoric rise in popularity, Christopher Kul-Want and Piero explore Zizek's timely analyses of today's global crises concerning ecology, mounting poverty, war, civil unrest and revolution. Covering topics from philosophy and ethics, politics and ideology, religion and art, to literature, cinema, corporate marketing, quantum physics and virtual reality, Introducing Slavoj Zizek deftly explains Zizek's virtuoso ability to transform apparently outworn ideologies – Communism, Marxism and psychoanalysis – into a new theory of freedom and enjoyment.

The works of French philosopher Alain Badiou range from novels, poems, “ romanop é ras ” and popular political treatises to elaborate philosophical arguments engaging with mathematical theory. Throughout all of his writings, there is a staunch commitment to emancipatory politics and radical change through fidelity to what he calls the “ event ” and its “ truth ” . Badiou ' s famous, or infamous, philosophy of emancipation is faithful to the communist truth, the universal idea of a collective life, but he also claims that “ philosophy is always a biography of the philosopher ” . Introducing Alain Badiou is an elegantly written and crisply illustrated guide to an essential contemporary thinker.

What really happens at the most fundamental levels of nature? Introducing Particle Physics explores the very frontiers of our knowledge, even showing how particle physicists are now using theory and experiment to probe our very concept of what is real. From the earliest history of the atomic theory through to supersymmetry, micro-black holes, dark matter, the Higgs boson, and the possibly mythical graviton, practising physicist and CERN contributor Tom Whyntie gives us a mind-expanding tour of cutting-edge science. Featuring brilliant illustrations from Oliver Pugh, Introducing Particle Physics is a unique tour through the most astonishing and challenging science being undertaken today.

Call it the year of dreaming dangerously: 2011 caught the world off guard with a series of shattering events. While protesters in New York, Cairo, London, and Athens took to the streets in pursuit of emancipation, obscure destructive fantasies inspired the world ' s racist populists in places as far apart as Hungary and Arizona, achieving a horrific consummation in the actions of mass murderer Anders Breivik. The subterranean work of dissatisfaction continues. Rage is building, and a new wave of revolts and disturbances will follow. Why? Because the events of 2011 augur a new political reality. These are limited, distorted—sometimes even perverted—fragments of a utopian future lying dormant in the present

Where are we today and what is to be done? Slavoj Zizek ponders these questions in this unique and timely book. Based on live interviews, the book captures Zizek at his irrepressible best, elucidating such topics as the uprisings of the Arab Spring, the global financial crisis, populism in Latin America, the rise of China and even the riddle of North Korea. Zizek dazzles readers with his analyses of Hollywood films, Venezuelan police reports, Swedish crime fiction and much else. Wherever the conversation turns, his energetic mind illuminates unexpected horizons. While analyzing our present predicaments, Zizek also explores possibilities for change. What sort of society is worth striving for? Why is it difficult to imagine alternative social and political arrangements? What are the bases for hope? A key obligation in our troubled times, argues Zizek, is to dare to ask fundamental questions: we must reflect and theorize anew, and always be prepared to rethink and redefine the limits of the possible. These original and compelling conversations offer an engaging and accessible introduction to one of the most important thinkers of our time.

What is beauty, and what is truth? These are some of the questions which aesthetics tries to answer. In our everyday life, we talk about the 'aesthetics' of an artwork or a piece of design. But aesthetics goes beyond the simple experience of art. It is also a branch of philosophy concerned with the whole nature of experience itself, explored through our perceptions, feelings and emotions.

A philosopher and cultural critic discusses the diverse ways in which violence is perceived and misperceived in the world, addressing such provocative issues as whether or not capitalism, or even civilization, causes more violence than it prevents, and the inherent violence of globalization, fundamentalism, and language. Original. 30,000 first printing.

INTRODUCING guide to the hugely influential German thinker. Georg Wilhelm Friedrich Hegel is one of the greatest thinkers of all time. No other philosopher has had such a profound impact on the ideas and political events of the 20th century. Hegel's influential writings on philosophy, politics, history and art are parts of a larger systematic whole. They are also among the most difficult in the entire literature of philosophy. Introducing Hegel guides us through a spectacular system of thought which aimed to make sense of history. The book also provides new perspectives on contemporary postmodern debates about 'metanarratives' (Lyotard) and the 'end of history' (Fukuyama). It is an ideal introduction to this crucial figure in the history of philosophy, and is indispensable for anyone trying to understand such key modern thinkers as Marx, Lacan, Satre and Adorno.

This book places Michel Foucault's work in its turbulent philosophical and political context, and critically explores his mission to expose the links between knowledge and power in the human sciences, their discourses and institutions. It explains how Foucault overturned our assumptions about the experience and perception of madness, sexuality and criminality, and the often brutal social practices of confinement, confession and discipline.

Marx's critique of political economy is vital for understanding the crisis of contemporary capitalism. Yet the nature of its relevance and some of its key tenets remain poorly understood. This bold intervention brings together the work of leading Marx scholars Slavoj Zizek, Frank Ruda and Agon Hamza, to offer a fresh, radical reinterpretation of Marxism that explains the failures of neoliberalism and lays the foundations for a new emancipatory politics. Avoiding trite comparisons between Marx's worldview and our current political scene, the authors show that the current relevance and value of Marx's thought can better be explained by placing his key ideas in dialogue with those that have attempted to replace them. Reading Marx through Hegel and Lacan, particle physics, and modern political trends, the authors provide new ways to explain the crisis in contemporary capitalism and resist fundamentalism in all its forms. Reading Marx will find a wide audience amongst activists and scholars.
