Introductory Statistics is designed for the one-semester, introduction to statistics course and is geared toward students majoring in fields other than math or engineering. This text assumes students have been exposed to intermediate algebra, and it focuses on the applications of statistical knowledge rather than the theory behind it. The foundation of this textbook is Collaborative Statistics, by Barbara Illowsky and Susan Dean. Additional topics, examples, and ample opportunities for practice have been added to each chapter. The development choices for this textbook were made with the guidance of many faculty members who are deeply involved in teaching this course. These choices led to innovations in art, terminology, and practical applications, all with a goal of increasing relevance and accessibility for students. We strove to make the discipline meaningful, so that students can draw from it a working

Karla and Paul seemed like the picture-perfect newlyweds, but were really a pair of vicious killers who abducted, sexually tortured and murdered innocent schoolgirls, videotaping their evil acts in suburban Niagara Falls. Billed as the crime of the century in Canada, this case has received a great deal of media coverage on both sides of the border. Includes eight pages of photos.
