For Joint Battle Command-Platform (JBC-P) Customer: US Army, US Marine Corps. As the seventh and most advanced evolution of mounted computing, the Mounted Family of Computing Systems builds upon the strengths of its predecessors. MFOCS is the next generation of FBCB2 and Blue Force Tracking systems.

"The Department of Defense and the United States Marine Corps are under increased pressure to reduce costs and expenditures in response to the austere financial environment. Marine Corps information technology (IT) programs are in jeopardy due to budget shortfalls, which may result in reduced military capability. The purpose of this study is to test the theory of vicious business cycles, which relates cost reduction to return on investment for the Joint Battle Command Platform. The Joint Battle Command Platform is an Acquisition Category II program of record designed to meet joint requirements for a common C2/SA system between the Army and Marine Corps. In an attempt to achieve cost savings, the JBC-P has undergone several cost reduction initiatives. Using several value metrics to measure the impact of cost reductions on the capability provided by the program, this study determines that cost reductions do reduce the value of the military capability provided by the program. These reductions could be an indication of a vicious cycle. Identifying the occurrence of vicious business cycles in IT programs will allow decision makers to more effectively cut costs without reducing military capability."--Abstract.

This U.S. Marine Corps Concepts and Programs document provides an encyclopedic summary of Marine Corps programs, weapons, equipment, and operational concepts. It provides a wealth of information about today's U.S. Marine Corps. They are America's expeditionary force in readiness. Here are some of the topics covered (space limitations prevent a complete listing): Marine Air Ground Task Force (MAGTF) \* Headquarters, U.S. Marine Corps \* Operating Forces \* Supporting Establishment \* Marine Corps Embassy Security Group \* Marine Barracks, Washington, D.C. \* CHAPTER 3: Programs \* Part 1: Equipping the Marines \* Infantry Automatic Rifle (IAR) \* Modular Weapons System (MWS) \* Semi-Automatic Sniper System (SASS) \* Multi-Shot Grenade Launcher \* Shoulder Launched Multi-purpose Assault Weapon (SMAW II) \* Handheld Radios Family of Systems (FOS) \* Marine Enhancement Program (MEP) \* Marine Expeditionary Rifle Squad (MERS) \* Infantry Combat Equipment (ICE) \* Tactical Hydrographic Survey Equipment (THSE) \* Day Optics Systems \* Thermal Optics Systems \* Laser Targeting and Illumination Systems \* Part 2: Command and Control \* Marine Corps Information Enterprise (MCIENT) Strategy \* Marine Corps Enterprise Information Technology Services (MCEITS) \* Global Command and Control System (GCCS) \* Global Combat Support System - Marine Corps (GCSS-MC) \* Defense Readiness Reporting System - Marine Corps (DRRS-MC) \* Common Aviation Command and Control System (CAC2S) \* Theater Battle Management Core System (TBMCS) \* Tactical Combat Operations (TCO) System \* Composite Tracking Network (CTN) \* Combat Operations Center (COC) \* Mobile Modular Command and Control (M2C2) System \* Joint Battle Command Platform (JBC-P) \* Joint Tactical Common Operational Picture (COP) Workstation (JTCW) \* Blue Force Tracker (BFT) Family of Systems \* Warfighter Network Services-Tactical (WFNS-T) \* The Assault Amphibious Vehicle-Command; C2 Upgrade Program \* Multi-

Band Radio (MBR) \* High Frequency Radio (HFR) \* Part 3: Intelligence, Surveillance, and Reconnaissance \* Marine Corps Intelligence, Surveillance, and Reconnaissance Enterprise (MCISR-E) \* Distributed Common Ground System-Marine Corps (DCGS-MC) \* Communication Emitter Sensing and Attacking System (CESAS) \* Joint Surveillance Target Attack Radar System (JSTARS) \* Common Ground System (CGS) \* Counterintelligence (CI) and Human Intelligence (HUMINT) Equipment Program (CIHEP) \* much more. America's Marines provide a large range of capabilities for the modest investment of our nation's scarce resources. In the most recent months and years, in locations all over the globe -Pakistan, Haiti, the Caribbean, the U.S. Gulf Coast, South America, the Gulf of Aden, the Philippines, and Afghanistan - Marine Corps forces were either engaging with our allies, conducting full spectrum counter-insurgency operations, enabling the Joint Force and Interagency Non-governmental Agency elements, providing humanitarian assistance and disaster relief, deterring aggression or contributing to assured access. Today's Marine Corps is a "middleweight force." We fill the void in our nation's defense for an agile force that is comfortable operating at the high and low ends of the threat spectrum or the more likely ambiguous areas in between. We will continue to support our national objectives in Afghanistan. Concurrently, we will modernize, reset and reconstitute our equipment in order to provide a balanced air-ground-logistics team that is forward deployed and forward engaged; shaping, training, deterring and responding to a wide variety of global crises and contingencies. This is a privately authored news service and educational publication of Progressive Management.

This is the report from the Pentagon's Operational Test and Evaluation (OTE) Director, issued in January 2015 which contains extensive detailed information about over 100 major weapons systems under development by the Department of Defense, Army, Navy, and Air Force - including such consequential systems as the F-35 and BMD. Thorough operational testing should be conducted prior to a system's Full-Rate Production decision or deployment to combat in order to inform acquisition decision makers and operators in an objective way about how the system will perform in its combat missions. Under current law, the Director of Operational Test and Evaluation (DOT&E) is required to present his opinion on whether the operational testing conducted prior to the Beyond Low-Rate Initial Production decision is adequate or not. The Director must consider all the operational facets of a system's employment in combat when he determines what constitutes adequate operational testing, including the performance envelope the system must be able to achieve, the various operating conditions anticipated in a time of war, and the range of realistic operational threats.

This collection examines the subject of friendly fire through the eyes of international experts in the field.

The magazine of mobile warfare.

The U.S. Department of the Army is headquartered at the Pentagon in Arlington, Virginia, and authors The Soldier's Guide, The Complete Guide to Edible Wild Plants, U.S. Army Ranger Handbook, U.S. Army Hand-to-Hand Combat, U.S. Army First Aid Manual, U.S. Army Weapons Systems, U.S. Army Special Forces Handbook, U.S. Army Guide to Boobytraps, U.S. Army Explosives and Demolitions Handbook, U.S. Army Special Forces Guide to Unconventional Warfare, and U.S. Army Special Forces Medical Handbook. Skyhorse Publishing is proud to publish a range of books for readers interested in military tactics and skills. We publish content provided by or of interest to the U.S. Army, Army Rangers, the U.S. Navy, Navy SEALs, the U.S. Air Force, the U.S. Marine Corps, and the Department of Defense. Our books cover topics such as survival, emergency medicine, weapons, guns, weapons systems, hand-to-hand combat, and more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to publishing books on subjects that are sometimes overlooked by other publishers and to authors whose work might not otherwise find a home.
