The use of financial concepts and tools to shape development is hardly new, but their recent adoption by advocates of sustainable environmental management has created opportunities for innovation in business and regulatory groups. The Handbook of Environmental and Sustainable Finance summarizes the latest trends and attitudes in environmental finance, balancing empirical research with theory and applications. It captures the

Online Library Journal Of Finance

evolution of environmental finance from a niche scholarly field to a mainstream subdiscipline, and it provides glimpses of future directions for research. Covering implications from the Kyoto and Paris Protocols, it presents an intellectually cohesive examination of problems, opportunities, and metrics worldwide. Introduces the latest developments in environmental economics, sustainable accounting work, and environmental/sustainable finance. Explores the effects of environmental regulation on the economy and businesses. Emphasizes research about the trade-environmental regulation nexus, relevant for economics and business students.

Using a multi-country panel of banks, we study whether better capitalized banks experienced higher stock returns during the financial crisis. We differentiate

Online Library Journal Of Finance

among various types of capital ratios: the Basel risk-adjusted ratio; the leverage ratio; the Tier I and Tier II ratios; and the tangible equity ratio. We find several results: (i) before the crisis, differences in capital did not have much impact on stock returns; (ii) during the crisis, a stronger capital position was associated with better stock market performance, most markedly for larger banks; (iii) the relationship between stock returns and capital is stronger when capital is measured by the leverage ratio rather than the risk-adjusted capital ratio; (iv) higher quality forms of capital, such as Tier 1 capital and tangible common equity, were more relevant.

Analysis, Journal of Money, Credit and Banking, and The Review of Economics and Statistics. And he is a member (current and past) of the Editorial Board of several of these Journals. He is amongst others a member of the Board of Trustees of the Financial Management Association and formerly he was a member of the Board of Directors of the European Financial Management Association. Sudi Sudarsanam, Professor of Finance & Corporate Control, School of Management, Cranfield University. He joined Cranfield as Professor of Finance and Corporate Control on the 1 January 2000 from City University Business School where he was Professor of Finance and Accounting. His original commercial background was in banking and international trade finance. Sudi's main areas of research interest are in corporate restructuring, mergers and acquisitions

Online Library Journal Of Finance

and corporate strategy, adopting a multidisciplinary approach. He is one of the leading authorities on mergers and acquisitions in Europe and author of *The Essence of Mergers and Acquisitions* (Prentice Hall), translated into five European and Asian languages. His recent book, *Creating value from mergers and acquisitions: the challenges, an international and integrated perspective* (FT Prentice Hall, 2003, pp613) has been widely acclaimed by both academics and practitioners and is considered a standard work on M & A. He has been a visiting professor at US and European business schools. He has been an expert commentator on mergers and acquisitions on radio and television and in the print media. Sudi has also published articles in top US and European journals on corporate restructuring, corporate governance and valuation of intellectual

Online Library Journal Of Finance

assets.

As defined contribution pensions become prevalent, retirees are increasingly responsible for managing their own pension assets and thus their own financial literacy becomes crucial. Based on empirical evidence and new research, the book examines how financial literacy enhances retirement decision-making in ever more complex financial markets.

Financial crises are recurring phenomena that result in the financial distress of systemically important banks, making it imperative to understand how to best respond to such crises and their consequences. Two policy responses became prominent for dealing with these distressed institutions since the last Global

Online Library Journal Of Finance

Financial Crisis: bailouts and bail-ins. The main questions surrounding these responses touch everyone: Are bailouts or bail-ins good for the financial system and the real economy? Is it essential to save distressed financial institutions by putting taxpayer money at risk in bailouts, or is it better to use private money in bail-ins instead? Are there better options, such as first lines of defense that help prevent such distress in the first place? Can countercyclical prudential and monetary policies lessen the likelihood and severity of the financial crises that often bring about this distress? Through careful analysis, authors Berger and Roman review and critically assess the extant theoretical and empirical research on many resolution approaches and tools. Placing special emphasis on lessons learned from one of the biggest bailouts of all time, the Troubled Asset Relief

Online Library Journal Of Finance

Program (TARP), while also reviewing other programs and tools, TARP and Other Bank Bailouts and Bail-Ins around the World sheds light on how best to protect the financial system on Wall Street and the real economy on Main Street. Presents a well-informed and rich account of bailouts, bail-ins, and other resolution approaches to resolve financially distressed banks. Uses TARP as a key case study of bailouts that has been thoroughly researched. Provides valuable research and policy guidance for dealing with future financial crises.
