Kaeser's design for this latest generation of compressors far exceeds current norms, including the use of high efficiency IE4 motors as standard. This not only ensures that compressed air stations will meet future legal efficiency requirements, but also brings an additional energy cost saving of approximately one percent. CSD and CSDX systems therefore provide four-way energy savings: First ...

Kaeser Compressors provides products, services and complete systems for supplying production and work processes with quality compressed air. The system solutions comprise compressed air generation and treatment and are designed for optimal overall efficiency. Kaeser Kompressoren was founded in 1919 and Kaeser USA's headquarters opened in 1982.

Author and crime writer Mark Jones presents the stories, and criminal minds, of nine serial offenders who terrorized South Carolina during the latter part of the twentieth century. The "Super Christian"? who turned a small beach community into a terrified town. The "Gaffney Strangler"? who taunted police with the message, "Stop me or I will kill again."? The schoolteacher-turned-rapist who eluded authorities for more than thirty years. And of course, the horrifying and tragic life of South Carolina's most successful serial killer, Pee Wee Gaskins. All are revealed here in chilling detail.

Presents a collection of short mystery stories set in the state of New Jersey by such authors as Bradford Morrow, Sheila Kohler, Richard Burgin, and Alicia Ostriker.

In Learning with Information Systems the author takes the developing world as the context and through a series of case studies develops a commonly used systems analysis methodology. He demonstrates how this methodology can evolve and adapt as new ideas become prominent. Issues of sustainability of information systems, participation in systems design and user ownership of systems are all examined. This book does not attempt to be prescriptive for all contexts nor does it focus on any particular technology. It addresses the essential questions and promises practical approaches which will help in the avoidance of the worst forms of disaster associated with the planning of information systems for developing countries.

A 100-page, perfect-bound notebook, with neatly-lined interior pages. This is just one of many personalised notebooks from Silly Notebooks. If you want a notebook with a different name or animal on it, or if you have a photo you would like on the cover, or any other design for that matter, then please contact the team at Silly Notebooks. Unfortunately, I cannot place links on here to the Silly Notebooks website, where you can also have a look at some of the other notebooks available on Amazon, so you will need to do an Internet search for Silly Notebooks. Once you have found the site (which comes top on most popular search engines), please feel free to contact us with whatever ideas you have for your own personalised notebook and we will try to help. We do not charge for design and publishing, you only pay the price of the notebook on Amazon. We look forward to hearing from you.

Standardized test-taking skills for reading, math and language for grade 7.

This is a story which will make your heart sing - a story for all the family to read together. Young Judy discovers an unexpected package in her grandfather's old study. She has never met her grandfather (Poppy) as he died before she was born, but Judy is the one to unearth the puzzle which Poppy left for his family. To find the treasure which Poppy left, the family must first solve every riddle which he wrote on a beautiful scroll, and carefully wrapped in a rich purple velvet bag. Unless they solve the puzzles, they won't find the treasure. See if you can solve the puzzles before the family does. What has Poppy left them as an inheritance? Have fun with the story and enjoy the Omega Prize at the end.

THE FIRST PSY/CHANGELING NOVEL from the New York Times bestselling author of Shards of Hope, Shield of Winter, and Heart of Obsidian... The book that Christine Feehan called "a must-read for all of my fans." In a world that denies emotions, where the ruling Psy punish any sign of desire, Sascha Duncan must conceal the feelings that brand her as flawed. To reveal them would be to sentence herself to the horror of "rehabilitation"—the complete psychic erasure of everything she ever was...Both human and animal, Lucas Hunter is a Changeling hungry for the very sensations the Psy disdain. After centuries of uneasy coexistence, these two races are now on the verge of war over the brutal murders of several Changeling women. Lucas is determined to find the Psy killer who butchered his packmate, and Sascha is his ticket into their closely guarded society. But he soon discovers that this ice-cold Psy is very capable of passion—and that the animal in him is fascinated by her. Caught between their conflicting worlds, Lucas and Sascha must remain bound to their identities—or sacrifice everything for a taste of darkest temptation...

Offering an in-depth exploration of AJAX technologies, this book is ideal for programmers with or without a Web programming background. It provides readers with a detailed code-rich walkthrough on writing AJAX programs, and introduces key AJAX techniques and program models.

With an increase in visits to remote and dangerous locations around the world, the number of serious and fatal injuries and illnesses associated with these expeditions has markedly increased. Medical personnel working in or near such locations are not always explicitly trained in the management of unique environmental injuries, such as high-altitude sickness, the bends, lightning strikes, frostbite, acute dehydration, venomous stings and bites, and tropical diseases. Many health care professionals seek training in the specialty of wilderness medicine to cope with the health risks faced when far removed from professional care resources, and the American College of Emergency Medicine has recently mandated that a minimum level of proficiency needs to be exhibited by all ER physicians in this discipline. This book covers everything a prospective field physician or medical consultant needs to prepare for when beginning an expedition and explains how to treat a variety of conditions in a concise, clinically oriented format.
