Once derided as senseless entertainment, movies have gradually assumed a place among the arts. Raymond Haberski's provocative and insightful book traces the trajectory of this evolution throughout the twentieth century, from nickelodeon amusements to the age of the financial blockbuster. Haberski begins by looking at the barriers to film's acceptance as an art form, including the Chicago Motion Picture Commission hearings of 1918--1920, one of the most revealing confrontations over the use of censorship in the motion picture industry. He then examines how movies overcame the stigma attached to popular

entertainment through such watershed events as the creation of the Museum of Modern Art's Film Library in the 1920s. The arguments between Pauline Kael and Andrew Sarris's heralded a golden age of criticism, and Haberski focuses on the roles of Kael, Sarris, James Agee, Roger Ebert, and others, in the creation of "cinophilia." Described by Susan Sontag as "born of the conviction that cinema was an art unlike any other," this love of cinema centered on coffee houses, universities, art theaters, film festivals, and, of course, foreign films. The lively debates over the place of movies in American culture began to wane in the 1970s. Haberski places the blame on the loss of cultural authority and on the increasing irrelevance of the meaning of art. He concludes with a persuasive call for the re-emergence of a middle ground between art and entertainment, "something more complex, ambiguous, and vexing -- something worth thought."

The New York Times film critic shows why we need criticism now more than ever Few could explain, let alone seek out, a career in criticism. Yet what A.O. Scott shows in *Better Living Through Criticism* is that we are, in fact, all critics: because critical thinking informs almost every aspect of artistic creation, of civil action, of interpersonal life. With penetrating insight and warm humor, Scott shows that while individual critics--himself included--can make mistakes and find flaws where they shouldn't, criticism as a discipline is one of the noblest, most creative, and urgent activities of modern existence. Using his own film criticism as a starting point--everything from his infamous dismissal

of the international blockbuster *The Avengers* to his intense affection for Pixar's animated *Ratatouille*--Scott expands outward, easily guiding readers through the complexities of Rilke and Shelley, the origins of Chuck Berry and the Rolling Stones, the power of Marina Abramovich and 'Ode on a Grecian Urn.' Drawing on the long tradition of criticism from Aristotle to Susan Sontag, Scott shows that real criticism was and always will be the breath of fresh air that allows true creativity to thrive. "The time for criticism is always now," Scott explains, "because the imperative to think clearly, to insist on the necessary balance of reason and passion, never goes away."
