Ottoman Empire, Safavid Empire, or Mughal Empire 4. Read the section in the textbook (pages 88-93) that talks about the HISTORY of your chosen empire. If you need to, you can add information from research as well. Summarize the history into your own words.

The prophet Muhammad and the early Islamic community radically redefined the concept of time that they had inherited from earlier religions' beliefs and practices. This new temporal system, based on a lunar calendar and era, was complex and required sophistication and accuracy. From the ninth to the sixteenth centuries, it was the Muslim astronomers of the Ottoman, Safavid and Mughal empires who were responsible for the major advances in mathematics, astronomy and astrology. This fascinating study compares the Islamic concept of time, and its historical and cultural significance, across these three great empires. Each empire, while mindful of earlier models, created a new temporal system, fashioning a new solar calendar and era and a new round of rituals and ceremonies from the cultural resources at hand. This book contributes to our understanding of the Muslim temporal system and our appreciation of the influence of Islamic science on the Western world.

Five hundred years ago the great walled city of Constantinople fell under the relentless siege of the Ottoman Turks led by Sultan Mehmed II, Mehmed the Conqueror. Kritovoulos, one of the vanquished Greeks, later entered into the service of the Conqueror and began to write a history of the Sultan's life, starting with the year 1451, the beginning of Mehmed's 31-year reign. Death apparently prevented Kritovoulos from completing his account, but the manuscript covering the first seventeen years has been preserved and this exciting chronicle is here translated into English for the first time. Charles T. Riggs, who died in February 1953 at Robert College in modern Istanbul, was a missionary in the Near East. Originally published in 1954, The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

This longue dur ée survey of the Indian subcontinent's environmental history reveals the complex interactions among its people and the natural world.

Many non-Muslims have no idea that Muslims worship the same God as Christians and Jews, and that Islam preaches compassion, charity, humility, and the brotherhood of man. And the similarities don't end there. According to Islamic teaching, Muhammad founded Islam in 610 CE after the angel Gabriel appeared to him at Mecca and told him that God had entered him among the ranks of such great biblical prophets as Abraham, Moses, and Christ. Whether you live or work alongside Muslims and want to relate to them better, or you simply want to gain a better understanding of the world's second largest religion, Islam For Dummies can help you make sense of this religion and its appeal. From the Qur'an to Ramadan, this friendly guide introduces you to the origins, practices and beliefs of Islam, including: Muhammad, the man and the legend The Five Pillars of Wisdom The Five Essentials beliefs of Islam The different branches of Islam and Islamic sects The Qur'an and Islamic law Islam throughout history and its impact around the world Professor Malcolm Clark explores the roots of Islam, how it has developed over the centuries, and it's long and complex relationship with Christianity. He helps puts Islam in perspective as a major cultural and geopolitical force. And he provides helpful insights into, among other things: Muhammad, the Qur'an and the ethical teachings of Islam Muslim worship, customs, and rituals surrounding birth, marriage, and death Shi'ites, Sunnis, Sufis, Druze, and other important Muslim groups Islam in relation to Judaism and Christianity In these troubled times, it is important that we try to understand the belief systems of others, for through understanding comes peace. Islam For Dummies helps you build bridges of understanding between you and your neighbors in the global village. Islam For Dummies (9781119642978) was previously published as Islam For Dummies (9780764555039). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product.

Provides a new framework for reconceptualizing the historical and contemporary relationship between cultural diversity, political authority, and international order.

At the end of the sixteenth century and the turn of the first Islamic millennium, the powerful Mughal emperor Akbar declared himself the most sacred being on earth. The holiest of all saints and above the distinctions of religion, he styled himself as the messiah reborn. Yet the Mughal emperor was not alone in doing so. In this field-changing study, A. Azfar Moin explores why Muslim sovereigns in this period began to imitate the exalted nature of Sufi saints. Uncovering a startling yet widespread phenomenon, he shows how the charismatic pull of sainthood (wilayat)—rather than the draw of religious law (sharia) or holy war (jihad)—inspired a new style of sovereignty in Islam. A work of history richly informed by the anthropology of religion and art, The Millennial Sovereign traces how royal dynastic cults and shrine-centered Sufism came together in the imperial cultures of Timurid Central Asia, Safavid Iran, and Mughal India. By juxtaposing imperial chronicles, paintings, and architecture with theories of sainthood, apocalyptic treatises, and manuals on astrology and magic, Moin uncovers a pattern of Islamic politics shaped by Sufi and millennial motifs. He shows how alchemical symbols and astrological rituals enveloped the body of the monarch, casting him as both spiritual guide and material lord. Ultimately, Moin offers a striking new perspective on the history of Islam and the religious and political developments linking South Asia and Iran in early-modern times.

Based on a completely reconstructed archive of Persian, Hindi and Marathi documents, Nandini Chatterjee provides a unique micro-history of a family of landlords in Malwa, central India, who flourished in the region from at least the sixteenth until the twentieth century. By exploring their daily interactions with imperial elites as well as villagers and marauders, Chatterjee offers a new history from below of the Mughal Empire, far from the glittering courts of the emperors and nobles, but still dramatic and filled with colourful personalities. From this perspective, we see war, violence, betrayal, enterprise, romance and disappointment, but we also see a quest for law, justice, rights and righteousness. A rare story of Islamic law in a predominantly non-Muslim society, this is also an exploration of the peripheral regions of the Maratha empire and a neglected princely state under British colonial rule. This title is also available as Open Access.

A new interpretation of the Mughal Empire explores Mughal state formation through the pivotal role of its princes.
