More than a tenth of the land mass of the UK comprises 'urban fringe': the countryside around towns that has been called 'planning's last frontier'. One of the key challenges facing spatial planners is the land-use management of this area, regarded by many as fit only for locating sewage works, essential service functions and other un-neighbourly uses. However, to others it is a dynamic area where a range of urban and rural uses collide. Planning on the Edge fills an important gap in the literature, examining in

detail the challenges that planning faces in this no-man's land. It presents both problems and solutions, and builds a vision for the urban fringe that is concerned with maximising its potential and with bridging the physical and cultural rift between town and country. Its findings are presented in three sections: the urban fringe and the principles underpinning its management sectoral challenges faced at the urban fringe (including commerce, energy, recreation, farming, and housing) managing the urban fringe more effectively in the future. Students, professionals and researchers alike will benefit from the book's structured approach, while the global and transferable nature of the principles and ideas underpinning the study will appeal to an international audience.

Emilio Sereni's classic work is now available in an English language edition. History of the Italian Agricultural Landscape is a synthesis of the agricultural history of Italy in its economic, social, and ecological context, from antiquity to the mid-twentieth century. From his perspective in the Italian tradition of cultural Marxism, Sereni guides the reader through the millennial changes that have affected the agriculture and ecology of the regions of Italy, as well as through the successes and failures of farmers and technicians in antiquity, the middle ages, the Renaissance, and the Industrial Revolution. In this sweeping historical survey, he describes attempts by successive generations to adapt Italy's natural environment for the purposes of

Agriculture and to respond to its changing ecological problems. History of the Italian Agricultural Landscape first appeared in 1961. At the time of its publication it was a pathbreaking work, parallel in its importance for Italy to Marc Bloc's masterwork of 1931, The Original Characteristics of French Rural History. Sereni invented the concept of the historical "agricultural landscape": an interdisciplinary characterization of rural life involving economic and social history, linguistics, archeology, art history, and ecological studies. Originally published in 1997.
