New York Times Bestseller After twenty consecutive losing seasons for the Pittsburgh Pirates, team morale was low, the club's payroll ranked near the bottom of the sport, game attendance was down, and the city was becoming increasingly disenchanted with its team. Pittsburghers joked their town was the city of champions...and the Pirates. Big Data Baseball is the story of how the 2013 Pirates, mired in the longest losing streak in North American pro sports history, adopted drastic big-data strategies to end the drought, make the playoffs, and turn around the franchise's fortunes. Award-winning journalist Travis Sawchik takes you behind the scenes to expertly weave together the stories of the key figures who changed the way the small-market Pirates played the game. For manager Clint Hurdle and the front office staff to save their jobs, they could not rely on a free agent spending spree, instead they had to improve the sum of their parts and find hidden value. They had to change. From Hurdle shedding his old-school ways to work closely with Neal Huntington, the forward-thinking data-driven GM and his team of talented analysts; to pitchers like A. J. Burnett and Gerrit Cole changing what and where they threw; to Russell Martin, the undervalued catcher whose expert use of the nearly-invisible skill of pitch framing helped the team's pitchers turn more balls into strikes; to Clint Barmes, a solid shortstop and one of the early adopters of the unconventional on-field shift which forced the entire infield to realign into positions they never stood in before. Under Hurdle's leadership, a culture of collaboration and creativity flourished as he successfully blended whiz kid analysts with graybeard coaches—a kind of symbiotic teamwork which was unique to the sport. Big Data Baseball is Moneyball on steroids. It is an entertaining and enlightening underdog story that uses the 2013 Pirates season as the perfect lens to examine the sport's burgeoning big-data movement. With the help of data-tracking systems like PitchFX and TrackMan, the Pirates collected millions of data points on every pitch and ball in play to create a tome of color-coded reports that revealed groundbreaking insights for how to win more games without spending a dime. In the process, they discovered that most batters struggled to hit two-seam fastballs, that an aggressive defensive shift on the field could turn more batted balls into outs, and that a catcher's most valuable skill was hidden. All these data points which aren't immediately visible to players and spectators, are the bit of magic that led the Pirates to spin straw in to gold, finish the 2013 season in second place, end a twenty-year losing streak.

Michael Bonner knew he wanted to be a teacher after his favorite college professor, Dr. Poulson, inspired him. The professor ' s passion and love for teaching prompted Michael to change his major and his life ' s direction. But nothing prepared Michael for the reality of a Title One school. Teaching is fun until a 7-year-old is assaulting you or you ' re dodging furniture being thrown at you. When you mix the craziness of a classroom with a marriage that was about to implode, anyone might want to quit. Smiling on the outside while feeling dead on the inside took this dedicated teacher to the breaking point. Michael knew he must change what was inside him, in his approach to life, or nothing would change anywhere else. So Michael took matters into his own hands to make four key paradigm shifts that helped him create a world of successful learning for his students and love within both the classroom and beyond. The result has been a transformation that ' s taken Michael far beyond the classroom as he inspires thousands across the country. Many agree teaching is an amazing profession but there ' s little discussion why so many teachers are leaving the profession. Get Up or Give Up: How I Almost Gave Up on Teaching shines a light into the internal battles and decisions educators face daily, and how we must make a conscious decision either to give in—or push through.
