Project, Energy and Infrastructure Finance
Project financing, by contrast is “limited” or “non-recourse” to the shareholders. In the case of non-recourse financing, the project company is generally a limited liability special purpose project vehicle, and so the lenders' recourse will be limited primarily or entirely to the project assets (including completion and performance guarantees and bonds) in the case of default of the project company.

The reason for granting such a mortgage in project finance relates to the legal nature of some types of equipment. Specifically, it is unclear whether equipment directly and firmly attached to the land (e.g. mounting structure, fence, transmission line tower, and underground cable) are “fixtures”, which is real property, or “moveables” under Japanese law.

Legal due diligence is usually conducted using an independent legal counsel appointed by the lenders. Legal due diligence consists of a few steps: Determining the rights and liabilities of the different participants within the project scope. Analyzing the schedule and implementation plan of the project.

introduction for practitioners uses new material and updates to describe the changing environment for project finance. Integrating recent developments in credit markets with revised insights into making project finance deals, the second edition offers a balanced view of project financing by combining legal, contractual, scheduling, and other subjects. Its emphasis on concepts and techniques makes it critical for those who want to succeed in financing large projects. With extensive cross-references and a comprehensive glossary, the Second Edition presents anew a guide to the principles and practical issues that can commonly cause difficulties in commercial and financial negotiations. Provides a basic introduction to project finance and its relationship with other financing techniques Describes and explains: sources of project finance;

Despite financial assessment of PF projects being fundamental to the lender's decision, there is little understanding of how the use of finance is perceived by individual stakeholders; why and how a financial assessment is performed; who should be involved; where and when it should be performed; what data should be used; and how financial assessments should be presented. Current uncertainty in financial markets makes many sponsors of construction project financings carefully consider bank liquidity, the higher cost of finance, and general uncertainty for demand. This has resulted in the postponement of a number of projects in certain industry sectors. Governments have seen tax receipts drastically reduced which has affected their ability to finance infrastructure projects, often irrespective of the perceived demand. Equity providers still seek to invest,

however there are less opportunities due to market dislocation. Due to the demand for global infrastructure it is believed that project financings will return to their pre-crunch levels, or more so,

however lenders' liquidity costs will be passed on to the borrowers. Lenders will also be under stricter regulation both internally and externally. The steps outlined in the guide are designed to provide a basic understanding for all those involved or interested in both structuring and assessing project financings.

Secondary contracts involving constructors, operators, finance providers, suppliers and offtakers can be developed and assessed to determine their commercial viability over a project's life cycle.
