whole of Who two episodes a day, every day, from the show's start in 1963 and ending with David Tennant's swan song on New Year's, 2010. This three-volume series contains Shearman and Hadoke's diary of that experience - a grand opus of their wry observations about the show, their desire to see the good in every story, and their chronicle of the real-life changes to Who in that year. With this book, Who fans will feel that they're watching along with Shearman (World Fantasy Award winner, Hugo Award nominee and writer on the new Doctor Who) and Hadoke (renowned stage performer for his one-man comedy show, *Moths Ate My Doctor Who Scarf*) as they make their grand journey through the world's most wonderful and longest-running drama series.

Chess enthusiast Herman Tolbert Sr takes three of the four elements of chess (space, time, force) and parallels a one to one mapping that relates Geometry, Physics and Mathematics in a unique theme he terms "Corridors". Compiling over-the-board tournament experience along with online worldwide games as well as friendly pick-up games, *Corridors* is a repeated process which eventually zones in on the King or significant material which has game winning advantages. This work hopes to demonstrate Mr. Tolbert's classroom teaching skills and his keen analytical ability to breakdown the complex into simpler form(s). *Corridors* is a combination of whole or partial rank(s), file(s) and square(s) which are controlled to a lasting degree which yield advantageous results. Many chess concepts are conveyed by novice to Grandmasters, but this unique work though not for the very beginner can be applied by the many eager-to-improve players; no matter the skill level. It is with this spirit that Mr. Tolbert wishes to share what he feels is a path of enlightenment, whose fruits of labor is a growth in understanding chess which can only lead to more victories.
