A totally recoilless air rifle, the RWS Model 54 Air King uses a "floating action", to achieve its maximum accuracy. When this magnum air rifle is fired, the action slides rearward in the stock, absorbing the recoil, and permitting the pellet to exit the barrel before any of the spring vibration affects its travel.

PLEASE NOTE: THIS IS VOLUME 2 OF 2. YOU MUST PURCHASE BOTH BOOKS TO HAVE A COMPLETE SET. Developed as both an air superiority fighter and a long-range naval interceptor, Grumman's F-14 Tomcat was the U.S. Navy's primary fighter from 1974 until 2006. Over 700 were built. The F-14 flew its first combat missions shortly after its initial deployment in late 1974, flying in support of the American withdrawal from Saigon. In 1981 it drew first blood, as two F-14s from VF-41 downed two Libyan Su-22s. The plane compiled a notable combat record for the United States in both Gulf Wars and NATO actions in Bosnia. Planes sold to the Shah of Iran prior to his ouster remain the last F-14s in active service, as the U.S. Navy retired it in October 2006. This F-14 pilot's flight operating handbook was originally produced by the U.S. Navy. It has been slightly reformatted but is reproduced here in its entirety. It provides a fascinating view inside the cockpit of one of history's great planes.

Now available for the first time since 2003, The Handloader's Manual of Cartridge Conversions offers the handloader all the physical data, how-to designs, tools, and drawings needed to convert modern, easily obtainable materials into more than 1,000 different rifle and pistol cartridge cases, ranging from the obsolete patterns to modern, cutting-edge "wildcats." This classic guide has been revised with a new, easy-to-reference format, complete with a full index of hundreds of cartridges. This truly is the handloader's one-stop guide for creating personalized cartridges.

The classic Greek lexicon which has proved invaluable to generations of Greek Testament students and scholars.It provides for each New Testament word its derivation, the Hebrew it represents if found in the Septuagint, its original and derived meanings with illustrations from biblical, classical and modern Greek, the general sense in which it is used in the papyri, its grammatical constructions, and references to other works in which it is discussed. There are also appendices of the irregular verbs of the Greek New Testament, and an alphabetical list of verbal forms.

Over 5,300 total pages. .... MARINE RECON Reconnaissance units are the commander's eyes and ears on the battlefield. They are task organized as a highly trained six man team capable of conducting specific missions behind enemy lines. Employed as part of the Marine Air-Ground Task Force, reconnaissance teams provide timely information to the supported commander to shape and influence the battlefield. The varying types of missions a Reconnaissance team conduct depends on how deep in the battle space they are operating. Division Reconnaissance units support the close and distant battlespace, while Force Reconnaissance units conduct deep reconnaissance in support of a landing force. Common missions include, but are not limited to: Plan, coordinate, and conduct amphibious-ground reconnaissance and surveillance to observe, identify, and report enemy activity, and collect other information of military significance. Conduct specialized surveying to include: underwater reconnaissance and/or demolitions, beach permeability and topography, routes, bridges, structures, urban/rural areas, helicopter landing zones (LZ), parachute drop zones (DZ), aircraft forward operating sites, and mechanized reconnaissance missions. When properly task organized with other forces, equipment or personnel, assist in specialized engineer, radio, and other special reconnaissance missions. Infiltrate mission areas by necessary means to include: surface, subsurface and airborne operations. Conduct Initial Terminal Guidance (ITG) for helicopters, landing craft, parachutists, air-delivery, and re-supply. Designate and engage selected targets with organic weapons and force fires to support battlespace shaping. This includes designation and terminal guidance of precision-guided munitions. Conduct post-strike reconnaissance to determine and report battle damage assessment on a specified target or area. Conduct limited scale raids and ambushes.
