Applies traditional economic theory to contemporary problems such as unemployment, inflation, and conflicting economic systems.

The aim of this book is to explore the economic fundamentals of European competition law.

Economics for today's student! Principles of Economics is designed with one overriding aim: to make this exciting and highly relevant subject clear, accessible and easy to understand. The text puts economics in the context of the real world, bringing the subject alive and giving students an insight into the economy in which we live and the economic forces that shape our lives. The distinguishing features of this resource are its clarity and conciseness, which make Principles of Economics ideally suited to introductory courses in economics largely inhabited by business studies students and other non-economics majors.

The primary aim of the text is to introduce the reader to the relationship between economics and ethics and to the application of economic ethics in the evaluation of the market. The reader will gain insight into: The ethical and methodological strategy of economics and criticism of the core assumptions that underpin the economic defence of free market operation. The characteristics of different ethical theories (utilitarianism, duty and rights ethics, justice and virtue ethics) that can be used to evaluate the free market. How to apply economics in conjunction with ethical theories to evaluate economic trends and policies that promote the free operation of the market and are subject to public debate. These insights will help to develop the reasoning and analytical skills needed to criticize economic analysis as well as to apply ethical concepts to moral issues in economic policy.

Microeconomics focuses on individual units like a consumer, a producer, a firm/industry, a commodity, etc. It analyses the behaviour of one market variable at a time. In microeconomics, the commodity markets are divided into perfect competitive markets and imperfect markets. 'Microeconomic Theory and Application (Part II)' deals with imperfect markets that are broadly classified into monopoly, monopolistic competition and oligopoly. Apart from this, the book also deals with the concept of factor pricing and its various aspects, in detail. This book supplements the classroom teaching and has been developed as per the syllabus of Bcom (Hons) II year course of the University of Delhi. The book would prove to be equally useful for all microeconomics courses at the graduation level across all the universities in India.

Selected reprints in the field of industrial organization and antitrust law.

This is an excerpt from the 4-volume dictionary of economics, a reference book which aims to define the subject of economics today. 1300 subject entries in the complete work cover the broad themes of economic theory. This extract concentrates on the topic of general equilibrium.

EBOOK: Microeconomics and Behaviour: Second South African edition

Foundations of Economics, fifth edition is ideal for students taking introductory economics modules as part of an interdisciplinary course. Building on the success of the previous editions, the book provides accessible overviews of key economic topics, interweaving these with real-world examples and practical activities to equip students to think for themselves. Features of this edition include: Topical and up-to-date material, presented alongside real-world examples and policy problemsAdditional mini case studies on areas such as banking, youth unemployment, sport and the music industry, to demonstrate the practical application of economics in contemporary situationsConsideration of the global financial crisis, European economy and recent policy developmentsSuccinctly offering the proven quality, consistency and clarity of the parent text Economics ('The Student Bible', BBC Radio 4), Foundations of Economics, fifth edition is the essential text for today's non-specialist economics student. The book is accompanied by an excellent resource package at www.mcgraw-hill.co.uk/textbooks/begg, which includes: For students: Interactive graphing tool, case studies, self-test questions, weblinks For lecturers: PowerPoint slides, lecture outlines, EZ Test Online test bank, videos & teaching notes, figures from the book, solutions to questions in the book & additional exam questions
