Technological advancements in the West since the last millennium have contributed to global modernity. Technologies set conditions for the closeness of the nation-states and for the affinity of the global and the local. They are also penetrating everyday life, and even sometimes the body, producing radical social changes. Yet, arguing that new technologies bring a new life and a promising future to global societies remains a questionable thesis.This book attempts to explore the relationship between new technologies and global societies, to gain an understanding of how the positive as well as negative influences of technologies bear on global societies, how their practices of use are resisted or re-interpreted by these societies, and how their social meaning is constituted through the process of negotiation with these societies. Part 1 is on science, technology, culture, and the body; Part 2 is on new media and generations, and Part 3 is on information and communication technologies (ICTs) and work.This book has been selected for coverage in Index to Social Sciences & Humanities Proceedings® (ISSHP®/ISI Proceedings)Index to Social Sciences & Humanities Proceedings (ISSHP CDROM version/ISI Proceedings)

Come risulta evidente dalla pratica clinica e riabilitativa, il bambino disprattico non sa prevedere ed organizzare un progetto d'azione; non sa controllare cio' che sta facendo nel corso dell'azione; quindi non sa fare, ma potremmo anche ammettere che non sa ancora fare, non ha cioè ancora imparato a realizzare funzioni. Funzioni e azioni possono pero' essere rispettivamente apprese e svolte con l'aiuto di esercizi mirati e svolti in modo continuativo. E' comunque indispensabile ricordare le difficoltà del bambino disprattico, se sottoposto a compiti nuovi, inusuali. L'Autrice propone un modello di valutazione e di intervento che tenga conto di ipotesi eziologiche e neuropsicologiche, sottolineando la necessità di procedere con un'analisi su diversi livelli: percettivo, motorio e rappresentativo. Particolare importanza viene data alla diagnosi e all'intervento precoce per poter provvedere alla definizione e messa in atto di adeguati progetti terapeutici. L'opera si conclude con l'analisi e la descrizione di casi clinici riferiti ad alcune peculiari forme di disprassia: la disprassia verbale e la disgrafia. Infine, vengono illustrati esercizi mirati rispetto ai vari ambiti dello sviluppo, ideati e sperimentati dai logopedisti che hanno contribuito, insieme all'Autrice, alla stesura del presente volume.

The rise of manufacturing intelligence is fuelling innovation in processes and products concerning a low environmental impact over the product ' s lifecycle. Sustainable intelligent manufacturing is regarded as a manufacturing paradigm for the 21st century, in the move towards the next generation of manufacturing and processing technologies. The manufacturing industry has reached a turning point in its evolution and new business opportunities are emerging. With sustainable development arises the immense challenge of combining innovative ideas regarding design, materials and products with non-polluting processes and technologies, conserving energy and other natural resources. On the other hand, sustainability has become a key concern for government policies, businesses and the general public. Model cities are embracing novel ecosystems, combining environmental, social and economic issues in more inclusive and integrated frameworks. Green Design, Materials and Manufacturing Processes includes essential research in the field of sustainable intelligent manufacturing and related topics, making a significant contribution to further development of these fields. The volume contains reviewed papers presented at the 2nd International Conference on Sustainable Intelligent Manufacturing, conjointly organized by the Centre for Rapid and Sustainable Product Development, Polytechnic Institute of Leiria, and the Faculty of Architecture, Technical University of Lisbon, both in Portugal. This event was held at the facilities of the Faculty of Architecture, Lisbon, from June 26 to June 29, 2013. A wide range of topics is covered, such as Eco Design and Innovation, Energy Efficiency, Green and Smart Manufacturing, Green Transportation, Life-Cycle Engineering, Renewable Energy Technologies, Reuse and Recycling Techniques, Smart Design, Smart Materials, Sustainable Business Models and Sustainable Construction. Green Design, Materials and Manufacturing Processes is intended for engineers, architects, designers, economists and manufacturers who are actively engaged in the advancement of science and technology regarding key sustainability issues, leading to more suitable, efficient and sustainable products, materials and processes.

Football is universal in the values that it protects and proposes, and in its capacity to produce social and economic value, the economic value coming from the professional domain and the social value from the amateur domain. The former is the domain of stars, big events, new stories, victories and outstanding feats of athleticism; the second is the less visible side of the whole movement, the domain of spontaneity, fun and participants of all ages and abilities being together regardless of race, religion, language or the chances of victory or great athletic feats. This book, the result of much study and contemplation on football management, embraces all of these themes, starting with the acknowledgement of the diversity of these two domains and at the same time of their inseparability.
