Names in Focus delves deep into the vast field of Finnish onomastics, covering place names, personal names, animal names, commercial names and names in literature. It provides the history and current trends in this area of research, and also supplements international terminology with the Finnish point of view on the subject. Brimming with examples and clear explanations, the book can be enjoyed by the most studious of researchers as well as the casual reader who has a genuine interest in the study of names.

This book contains a collection of the papers accepted in the 18th Asia Pacific Symposium on Intelligent and Evolutionary Systems (IES 2014), which was held in Singapore from 10-12th November 2014. The papers contained in this book demonstrate notable intelligent systems with good analytical and/or empirical results.

In this fascinating book, dancer, choreographer, and visual artist Paula Josa-Jones combines her two greatest passions--movement and horses--in order to help us develop somatic awareness: Consciousness of breath, integrated and coherent motion, and development of movements and touch into sensitive channels of communication. Through stories and exercises, Josa-Jones demonstrates how connecting with the horse can develop this awareness. The body and mind of the horse and the human, she writes, are connected at the deepest levels--anatomically, energetically, psychically, spiritually, and emotionally. And because horses are authentic beings--their inside feelings and intentions match the outside expression and behavior--our interactions with them can help us become more aware of our inner emotional landscape and its relationship to what we are expressing outwardly. Horses offer us the opportunity to become more trustworthy and more comfortable in our own skin.By listening inwardly, feeling the connections between our mind states and our expression, we become more attuned to the currents passing among us, more able to blend, empathize, and act with balance, sensitivity, and kindness.

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. They came as saviors to a deteriorating Earth. [Science Fiction] Julip Torne questions whether there is more to life beyond the barren dirt, acidic seas, and toxtorms her people work and die in. Living in poverty on the withering Greenland Human Reservation, she wonders if the alien Mezna goddesses are truly as holy as the temple preaches. Meanwhile, Jakkattu prisoner Sabaal suffers constant torture and heinous medical experiments as Mezna-priest captors seek to unlock the key to her genetic makeup. She escapes captivity but ends up alone on the hostile alien planet of Earth. If she is to survive, she must work with the same Mezna-human hybrids she's loathed her entire life. When humans and Mezna collide, will Sabaal turn out to be the genetic vector the Mezna have been searching for all along, or will she spark the flame that sets a revolution ablaze? "THE JAKKATTU VECTOR" by P.K. Tyler Evolved Publishing presents the first book in the "Jakkattu" series of sci-fi adventures, from national award-winning and USA Today best-selling author P.K. Tyler.
