Avery is no stranger to the weight of loss, the way it shapes and defines the expanse of a life. The death of her sister, when Avery was just a child herself, engulfed her and her family—a mother driven mad, a father who disappeared, and all the while, neighbors and friends ignoring and surviving. The loss shades Avery's full being, becoming a deep part of her past and her future. As a young woman, Avery's life in Eastern Oregon ranch country is filled with an acquired family: her partner Davis Lovell, a ranch hand and father figure; Lemmie, Lovell's daughter; and Davis's grandparents. When Avery suffers the loss of her and Davis's newborn child, it triggers and revives in her a familiar sense of guilt, one she has carried since childhood over the disintegration of her family. Written with the precision of Cynthia Ozick and the blunt passion of Alice Munro, this riveting story takes place on a landscape—the deserts of Eastern Oregon—itself a deeply important character in this remarkable first novel.

Bringing together conceptual obstacles and core concepts of evolutionary theory, this book presents evolution as straightforward and intuitive.

HE IS A MAN POSSESSED-BY A WOMAN WHOSE BEAUTY DRIVES MEN TO MADNESS. If there was ever a devil who could lure and seduce the innocent, Lord Sloan Treveryan is that man. Captain of the Sea Hawk and bound to the king's business, Treveryan may be a lord but he is no gentleman. Yet even he cannot ignore a lady in distress—or the temptation she provides. Bewitched by Brianna MacCardle's beauty, Scottish inquisitors have called her the devil's own. Though Treveryan saves her from the witch-hunter's clutches, how can she be grateful? He has carried Brianna off to America, claimed her, and taken her innocence. She vows that he will never capture her heart. But against her will she begins to fall in love—while swearing to reap revenge against the arrogant lord who has made her the devil's mistress.

During more than four decades of involvement in amateur astronomy, I have enjoyed the privilege of rubbing shoulders with numberless amateur and professional astr- omers. In so doing I have encountered at first, second, and third hand many of the joys and pitfalls that sky watchers can experience in pursuit of the universe's wonders. I have often howled at tall tales that would not disgrace a pirate's tavern. Many of these astounding stories have become the kernels of my Dear Steve column items. Learning how to operate the technology for observing and imaging the universe is work enough for any aspiring astronomer; however, many have fondly parodied these own making. Not only do they share these troubles with other astronomers, they are on the receiving end of colleagues and friends doing the same. With all these agonized communications flying about, it is hard to understand how anyone gets any real work done! For the amusement of my peers I have long fondly parodied these imagined literary exchanges. These fantasy "Agony Aunt" questions began appearing in the pages of the Loughton Astronomical Society's monthly (and Christmas Special) Journals about 30 years ago, in the guise of The astronomer's problem page. This was by the kind indulgence of the then editor, namely myself. Happily, even when the magazine of the LAS evolved into something much better, under the tender and loving care of those who came after me, these problem letters were still in demand and even now occasionally appear.
