Beyond The West inspires a fresh understanding of global contemporary architecture beyond the Western Countries. Architects throughout the world work against a backdrop of rapidly growing cities, changing societies and climate, and emerging economies. But while Western architecture has largely dominated the discourse, architecture firms from non-Western countries have been establishing local and global -recognition for themselves, often finding strikingly different solutions to local requirements, including sustainability, transportation and migration, construction materials, and traditions. Beyond The West journeys across Asia, Africa, and the Americas to under-stand how local architects respond to a changing world, and focuses its wide lens on inspiring and truly global architecture.

The recent sesquicentennial of August Strindberg's (1849-1912) birth was an appropriate occasion for investigating the role of this towering figure in Nordic literature. By Eugene O'Neill once labeled the most modern of moderns, Strindberg the playwright has commanded a prophetic influence on 20th century drama and theater, and his voluminous production in several other genres continues to constitute a watershed and some of the highpoints in Swedish letters. Yet, Strindberg remains as controversial today as he was in his lifetime. The nature and degree of his modernity are still under discussion, and so is the impact of his remarkable genre-proliferation and border-transgressing Swedishness. Once considered too unruly for the pillars of society and too pious for the radicals, his artistic and existential points of gravity remain in critical dispute. Generally subjected to traditional modes of inquiry, Strindberg's complexity calls for new critical approaches. Strindberg and the Other brings together scholars, younger and older, from Scandinavia and abroad, who either venture such new approaches or engage their practitioners in fruitful dialogue. Especially promising among the volume's methodological and theoretical propositions is the notion of the 'other' and 'otherness.' Indeed, the image of August Strindberg himself is quite an-other at this millennium than it was just half a century ago.

This collection of essays featuring contributions from eminent Swedish and American Strindberg scholars addresses the question of how Strindberg's art collides and colludes, ideologically and aesthetically, with the literary doyens of the nineteenth and twentieth centuries in both the Scandinavian and the larger Western cultural context.

This collection of essays written by leading American, British, and Swedish scholars surveys Swedish literature during the last 100 years, from 1891 to. 1991; it ranges from the work of Selma Lagerl"f and August Strindberg in the 1890s to that of Ing
