They the Qur'an and how it would have been understood by the earliest generations of Muslims. How much does historical memory come into play in current depictions of this early era? Beyond religious institutions, Muslim scholars and scientists were vital to both the transmission of knowledge from the Greek civilization and to the uninterrupted progress of science. The authors explore the role that non-Muslim minorities played within this culture and they detail the splits within the Muslim world that continue to this day.

This one thousand year history of the civilization of western Europe has already been recognized in France as a scholarly contribution of the highest order and as a popular classic. Jacques Le Goff has written a book which will not only be read by generations of students and historians, but which will delight and inform all those interested in the history of medieval Europe. Part one, Historical Evolution , is a narrative account of the entire period, from the barbarian settlement of Roman Europe in the fifth, sixth and seventh centuries to the war-torn crises of Christian Europe in the fourteenth and fifteenth centuries. Part two, Medieval Civilization , is analytical, concerned with the origins of early medieval ideas of culture and religion, the constraints of time and space in a pre-industrial world and the reconstruction of the lives and sensibilities of the people during this long period. Medieval Civilization combines the narrative and descriptive power characteristic of Anglo-Saxon scholarship with the sensitivity and insight of the French historical tradition.

Covers a dark period in European history - from the collapse of the Roman Empire through centuries of chaos, destruction, and barbarian rule. Includes map exercises, and review questions.

INVENTING THE MIDDLE AGES The Lives, Works, and Ideas of the Great Medievalists of the Twentieth Century In this ground-breaking work, Norman Cantor explains how our current notion of the Middle Ages—with its vivid images of wars, tournaments, plagues, saints and kings, knights and ladies—was born in the twentieth century. The medieval world was not simply excavated through systematic research. It had to be conceptually created: It had to be invented, and this is the story of that invention. Norman Cantor focuses on the lives and works of twenty of the great medievalists of this century, demonstrating how the events of their lives, and their spiritual and emotional outlooks, influenced their interpretations of the Middle Ages. Cantor makes their scholarship an intensely personal and passionate exercise, full of color and controversy, displaying the strong personalities and creative minds that brought new insights about the past. A revolution in academic method, this book is a breakthrough to a new way of teaching the humanities and historiography, to be enjoyed by student and general public alike. It takes an immense body of learning and transmits it so that readers come away fully informed of the essentials of the subject, perceiving the interconnection of medieval civilization with the culture of the twentieth century and having had a good time while doing it! This is a riveting, entertaining, humorous, and learned read, compulsory for anyone concerned about the past and future of Western civilization.

Pilgrimage inspired and shaped the distinct experiences of commoners and nobles, men and women, clergy and laity for over a thousand years. The result is an innovative sourcebook that offers a window into broader trends, shifts, and transformations in the Middle Ages.

This comprehensive, well-balanced historical survey of medieval Europe—from Roman imperial provinces to the Renaissance—covers all aspects of the history (political, literary, religious, intellectual, etc.) with a focus on social and political themes. It presents a complete picture of the complex process by which an ecumenical civilization that once ringed the basin of the Mediterranean Sea, evolved into three other distinctive civilizations—Latin Europe, Greek Eastern Europe and Asia Minor, and Islam. A six-part organization outlines late Mediterranean antiquity and early northern Europe; two heirs of the ancient world; the early Middle Ages; Christendom; authority and enterprise, 950-1100; culture and society in the high Middle Ages, 1100-1325; and Christendom and Europe, 1325-1519. For anyone interested in the history of Europe and the Middle Ages.

Vivid account of medieval life and happenings in a period ruled by 2 concepts: feudalism and church authority.
