When tram conductor, Hans, and ticket collector, Lars, claim that Beatrice is their niece, they save her from the same fate of her mother, but open themselves up to the dangers of hiding a Jewish child in 1940's Amsterdam.

In September 1999, an earthquake devastated much of Taiwan, toppling buildings, knocking out electricity, and killing 2,500 people. Within days, factories as far away as California and Texas began to close. Cut off from their supplies of semiconductor chips, companies like Dell and Hewlett-Packard began to shutter assembly lines and send workers home. A disaster that only a decade earlier would have been mainly local in nature almost cascaded into a grave global crisis. The quake, in an instant, illustrated just how closely connected the world had become and just how radically different are the risks we all now face. *End of the Line* is the first real anatomy of globalization. It is the story of how American corporations created a global production system by exploding the traditional factory and casting the pieces to dozens of points around the world. It is the story of how free trade has made American citizens come to depend on the good will of people in very different nations, in very different regions of the world. It is a story of how executives and entrepreneurs at such companies as General Electric, Cisco, Dell, Microsoft, and Flextronics adapted their companies to a world in which America's international policies were driven ever more by ideology rather than a focus on the long-term security and well-being of society. Politicians have long claimed that free trade creates wealth and fosters global stability. Yet Lynn argues that the exact opposite may increasingly be true, as the resulting global system becomes ever more vulnerable to terrorism, war, and the vagaries of nature. From a lucid explanation of outsourcing's true impact on American workers to an eye-opening analysis of the ideologies that shape free-market competition, Lynn charts a path between the extremes of left and right. He shows that globalization can be a great force for spreading prosperity and promoting peace—but only if we master its complexities and approach it in a way that protects and advances our national interest.

The fourth and final eBook in POLITICO's Playbook 2012 series once again provides an unprecedented minute-by-minute account of the race for the presidency. *The End of the Line* follows President Barack Obama and Republican challenger Mitt Romney as their campaign teams go all-in to win in the critical final weeks of the 2012 election. From Mitt Romney's "47 percent" video to Clint Eastwood's speech

to an empty chair, the 2012 presidential campaign did not lack for memorable moments. In *The End of the Line*, POLITICO senior White House reporter Glenn Thrush and senior political reporter Jonathan Martin chronicle every hairpin turn in a race that defied the predictions of pundits and prognosticators. While some political observers considered Barack Obama's reelection far from a sure thing, the president and his team remained resolute in their belief that they would prevail. In Boston, Mitt Romney's advisers were just as confident that their man was headed for a smashing victory. In the end, only one of those views would be validated by events. The outcome of this election was never foreordained, however, and would ultimately be determined by two candidates, three debates, and a thousand small but critical strategic decisions. With an eye toward writing a "first draft of history," Thrush and Martin report on the intense internal debates over ad strategy that defined the parameters of the fall campaign—including a crucial late-May decision by the Obama campaign that may have tipped the scales in the president's favor. They provide a behind-the-scenes look at the candidates' debate preparation sessions, and they reveal why Romney's campaign was so confident they were going to win. The action climaxes on election night, as the opposing camps huddle nervously in their hotel suites to await the verdict of the voters. *The End of the Line* reveals for the first time what the Obama brain trust really thought about the agonizingly long wait for Romney's official concession—and what happened after Obama put the telephone to his ear and heard the words "Hello, Mr. President, it's Mitt Romney." No one could have predicted all the twists and turns of the 2012 election—and no one was better equipped to chronicle them than the POLITICO team. *The End of the Line* is frontline campaign reporting at its finest, meticulously reported and compulsively readable.

Argues that if nothing is done to stop the squandering of fish stock, the ecological balance of life in the oceans will face collapse and millions of people could starve, and examines the causes and implications of the problem.

This volume tells the story of what the 1988 closing of the Chrysler assembly plant in Kenosha, Wisconsin, meant to the people who lived in that town. Through interviews with displaced autoworkers and other members of the community it dramatizes the lessons Kenoshans drew from the plant shutdown. This volume tells the story of what the 1988 closing of the Chrysler assembly plant in Kenosha, Wisconsin, meant to the people who lived in that company town. Since the early days of the 20th century, Kenosha had forged its identity and politics around the interests of the auto industry. When nearly 6000 workers lost their jobs in the shutdown, the community faced not only a serious economic crisis but also a profound moral one. In this study, Dudley describes the painful, often confusing process of change that residents of Kenosha, like the increasing number of Americans who are caught in the crossfire of de-industrialization, were forced to undergo. Through interviews with displaced autoworkers and Kenosha's community leaders, high-school counsellors and a rising class of upwardly mobile professionals, Dudley dramatizes the lessons Kenoshans drew from the plant shutdown.

In this classic of Russian humor and social commentary, a fired cable fitter goes on a binge and hopes a train to Petushki (where his "most beloved of trollops" awaits). On the way he bestows upon angels, fellow passengers, and the world at large a magnificent monologue on alcohol, politics, society, alcohol, philosophy, the pains of love, and, of course, alcohol.

After the death of leading haematologist Professor Anstruther, antiquarian book dealer Anthony Sparrow is tasked with clearing out his mansion of its books and papers. He soon begins to question the real circumstances of the old man's death: was he in fact murdered, and if so, who was responsible? The answer might be found in the personal diaries and letters which Sparrow unearths. But as he closes in on the answer, the perspective suddenly shifts and everything which he was sure about dissolves into
