I've had my Expedition Scout for at least 2 yrs. In that time it has worked perfectly until last weekend, one of the leather loops tore. Over the last 20 yrs I have only worn Timex watches because my very 1st watch, I got in 7th grade, lasted 3 yrs of rough and tough, torcherous life. Timex for life.

complete range of basic biochemistry of bone and cartilage components to the clinical evaluation of disease markers in bone and joint disorders. With contributions from over 75 international experts, Dynamics of Bone and Cartilage Metabolism, Second Edition, is indispensable reading for those involved in skeletal research as well as for rheumatologists, endocrinologists, clinical biochemists, and other clinical disciplines participating in the management of patients with bone and cartilage diseases. Part I provides an up-to-date account of current knowledge of the structure, biosynthesis and molecular biology of the major tissue components Part II covers the organizational structure and cellular metabolism of bone and cartilage Part III deals with the utility of components specific to bone and cartilage as biomarkers of health and disease

Here is a unique book. It describes the theories and processes of repairing and adjusting the modern watch in precise and meticulous detail: a thing which has never been done so completely before in the many books on the same subject. As a text book it is a revelation. Taking nothing for granted, except the ability to read and comprehend a simple description of mechanical processes, de Carle takes his reader through every stage and every operation of watch repairing ...and to deal with them thoroughly is quite a programme - it takes 300 pages containing 24 chapters, two appendices and 553 illustrations. The fine draughtsmanship and accurate technical detail of the illustrations set a new standard. Practical Watch Repairing can justifiably claim to be the best illustrated book on practical horology yet issued, and one of the best of its kind on any subject. The publication of the book marks the beginning of a new epoch in the study of the mechanics of horology.

your time outdoors. Based on the 5Cs of Survivability--cutting tools, covering, combustion devices, containers, and cordages--this valuable guide offers only the most important survival skills to help you craft resources from your surroundings and truly experience the beauty and thrill of the wilderness. Inside, you'll also discover detailed information on: Choosing the right items for your kit. Manufacturing needed tools and supplies. Collecting and cooking food. Protecting yourself from the elements. With Canterbury's guidance, you'll not only prepare yourself for any climate and situation, you'll also learn how to use the art of bushcraft to reconnect with nature in ways you've never imagined.

The sixth Jack Daniels mystery opens at a funeral. While Jack stands graveside, tears in her eyes, her cell phone rings. It's the killer, escaped maniac Alex Kork, taunting Jack, drawing her ever further into a twisted game of cat and mouse. Because, while Alex is more than willing to kill random victims, Jack is her true prey. But which woman wants revenge more?--From publisher description.

By age 25, Heather Anderson had hiked what is known as the "Triple Crown" of backpacking: the Appalachian Trail (AT), Pacific Crest Trail (PCT), and Continental Divide Trail (CDT) a combined distance of 7,900 miles with a vertical gain of more than one million feet. A few years later, she left her job, her marriage, and a dissatisfied life and walked back into those mountains. In her new memoir, *Thirst: 2600 Miles to Home*, Heather, whose trail name is "Anish," conveys not only her athleticism and wilderness adventures, but also shares her distinct message of courage--her willingness to turn away from the predictability of a more traditional life in an effort to seek out what most fulfills her. Amid the rigors of the trail--pain, fear, loneliness, and dangers--she discovers the greater rewards of community and of self, conquering her doubts and building confidence. Ultimately, she realizes that

records are merely a catalyst, giving her purpose, focus, and a goal to strive toward. Heather is the second woman to complete the "Double Triple Crown of Backpacking," completing the Appalachian, Pacific Crest, and Continental Divide National Scenic Trails twice each. She holds overall self-supported Fastest Known Times (FKTs) on the Pacific Crest Trail (2013) hiking it in 60 days, 17 hours, 12 minutes, breaking the previous men's record by four days and becoming the first women to hold the overall record and the Arizona Trail (2016), which she completed in 19 days, 17 hours, 9 minutes. She also holds the women's self-supported FKT on the Appalachian Trail (2015) with a time of 54 days, 7 hours, 48 minutes. Heather has hiked more than twenty thousand miles since 2003, including ten thru-hikes. An ultramarathon runner, she has completed six 100-mile races since August 2011 as well as dozens of 50 km and 50-mile events. She has attempted the infamous Barkley Marathons four times, starting a third loop once. Heather is also an avid mountaineer working on several ascent lists in the US and abroad.

The essential guide for the collector of mechanical wristwatches, with complete information on over 1,400 models from some 130 international brands With Wristwatch Annual, collectors have at hand a wealth of information on the latest offerings from today's most important watch producers, from Swiss mainstays like Rolex and Patek Philippe to the maverick independent brands springing up across Europe and the U.S. The book is arranged alphabetically by producer, and the movement, functions, case, band, price, and variations of each pictured watch are fully described. This year's edition, like its predecessors, will feature a variety of additional articles on independent watchmaking, key personalities in the watch world, and the technical aspects of horology. An illustrated glossary and a primer on watch care help acclimate the reader to the world of fine timepieces.

Brain Teasers for Kids - Riddles for the Whole Family "The mind once stretched by a new idea, never returns to its original dimensions." Ralph Waldo Emerson This kids book is a collection of 300 brain teasing riddles and puzzles. Their purpose is to make children think and stretch their minds. They are designed to test logic, lateral thinking as well as memory and to engage the brain in seeing patterns and connections between different things and circumstances. They are laid out in three chapters which get more difficult as you go through the book, in the author's opinion at least. The answers are at the back of the book if all else fails. These are more difficult riddles for kids and are designed to be attempted by children from 10 years onwards, as well as participation from the rest of the family. It is a perfect activity book for kids who like problem solving. These activities can be shared with the whole family. This book is one of a series of puzzle books for kids. The aim of all of them is to stretch children's brains through kids riddles and puzzles. They are kids books designed to challenge children to think laterally and more creatively.
