The modern-day world faces a hostile climate, depleted resources and the destruction of habitats. The dream that growth will lead to a materialistic utopia is left unfulfilled by a lack of ecological and economic capacity. The only choice is to find alternatives to increased growth, transform the structures and institutions currently shaping the world, change lifestyles and articulate a more credible vision for the future and lasting prosperity. As a reaction to the problems accrued by capitalism, new development approaches such as the concept of degrowth have evolved. Degrowth in Tourism explores newly-emerging development and philosophical approaches that provide more equity for host communities and offer a low-carbon future by looking at alternatives to the classic models of development and applying the concept of degrowth in a tourism context. Proposing that we need to shift tourism research from models which prioritize commodified tourism

experiences to those that offer alternative decommodified ones this book: Provides topical analysis and illustrates the key themes of degrowth; Discusses the relationship between tourism and degrowth from both a historic perspective and through contemporary patterns of activity; Includes international examples and case studies to translate theory into practical new approaches. A comprehensive review of the subject, this book will be of great interest to researchers and practitioners within tourism, development, environment and economics, as well as those specifically studying degrowth.

This book explores and challenges the relationship between tourism and development and establishes a conceptual link between the discrete yet interconnected disciplines of tourism studies and development studies. This revised and expanded second edition provides not only a comprehensive theoretical foundation in development studies but also a critical analysis of contemporary themes and issues relevant to the study of tourism and its potential contribution to development. The second edition contains new chapters on the following topics: • Tourism and Poverty Reduction • Cultural Heritage, Tourism and Socio-economic Development • Tourism, Climate Change and Development • Human Rights Issues in Tourism Development • Tourism, Development and International Studies

This significant volume is the first to focus on both the changing nature of tourism and the capacity of tourism to effect change, especially in the Global South. Geographically, this changing nature of tourism is based on the transforming relationships between demand, supply and location. While this is nothing new in tourism, recent decades have intensified the changing characteristics of global tourism. From another perspective, tourism represents a change, and nowadays many localities and regions aim to use tourism as a tool for positive change, i.e. development. However, this has turned out to be a challenging task in practice, especially in the Global South context where the relationship between tourism growth and local development has often been controversial. This book looks at a host of critical concepts in one volume, such as growth and development, adaptation and resilience, sustainability and responsibility, governance and planning and heritage and destination management strategies. By understanding the drivers of change, this book sheds new insight into the promise and role of sustainability and responsibility in tourism development. This book will be of great interest to all upper-level students, academics and researchers in the fields of Tourism, Geography and Cultural and Heritage studies.

Comprehensive and accessible, this Companion offers a thorough investigation into both traditional and fresh topics in tourist behaviour and experience. Arranged chronologically, the chapters examine tourist experience from the very idea of a tourist visit to the aftermath of returning home.

This book offers a comprehensive overview of the key principles and challenges involved in tourism marketing in a national park context. It provides a framework to apply marketing principles to inform practices and guide the sustainable management of national parks and protected areas. The main themes address the foundation principles of marketing and contextualise these principles around a series of key insights and challenges related to the delivery of sustainable tourism services in national parks. The book centres on the issues faced by park managers as they address the need to manage national parks sustainably for future generations. It will be of interest to natural resource and tourism students, tourism scholars and natural resource managers as well as researchers in the areas of geography and forestry.

Cambridge International AS and A Level Travel and Tourism offers comprehensive coverage with an international perspective and in-depth analysis of all topics. There are free online resources available containing a wide range of international case studies. - See more at: <http://education.cambridge.org/eu/subject/business-and-economics/cambridge-international-as-and-a-level-travel-and-tourism#sthash.ShgL36lw.dpuf>.

Tourism security is an important part of both security management and tourism. Private security professionals and police departments in tourism cities, as well as hotels, major attractions, and theme parks, have all come to realize that tourism security and safety issues (often called tourism surety) are essential for industry survival and success. In *Tourism Security*, leading expert Peter Tarlow addresses a range of key issues in tourism safety and security. The book guides the reader through a study of tourism security themes and best practices. Topics include the relationship between tourism security and the economy, hotel and motel security, risk and crisis management, public places, transportation, and legal issues. The book also includes case studies of four popular tourist destinations. With each destination, an interview with a police or security representative is included—providing unique, in-depth insight to security concerns. *Tourism Security* is an invaluable resource for private security professionals, police departments that serve tourist destinations, and tourism professionals who work in hotels or convention centers, or at attractions, casinos, or events. Explains what tourism security is and outlines safety procedures for different tourism environments Serves as a resource tool and how-to for implementing best practices Includes detailed case studies of four popular tourist destinations: Charleston, South Carolina, the Dominican Republic, Las Vegas, Nevada, and Rio de Janeiro, Brazil

With 29 contributors from across Europe and beyond, this work represents a unique and important resource that examines the many relationships between tourism and geopolitics, with a focus on experiences drawn from Central and Eastern Europe. It begins by assessing the changing nature of 'geopolitics', from pejorative associations with Nazism to the more recent critical and feminist geopolitics of social science's 'cultural turn'. The book then addresses the important historical role of Central and Eastern Europe (CEE) in geopolitical thinking, before exemplifying a range of contemporary interactions between tourism and geopolitics within this critical region. Pursuing innovative analytical paths, the book demonstrates the interrelated nature of tourism and geopolitics and emphasizes the freshness of this research area. Addressing key principles and ideas which are applicable globally, it is an essential source for researchers, teachers and students of tourism, geography, political science and European studies, as well as for diplomatic, business and consultant practitioners.

Questioning what shelter is and how we can define it, this volume brings together essays on different forms of refugee shelter, with a view to widening public understanding about the lives of forced migrants and developing theoretical understanding of this oft-neglected facet of the refugee experience. Drawing on a range of disciplines, including sociology, anthropology, law, architecture, and history, each of the chapters describes a particular shelter and uses this to open up theoretical reflections on the relationship between architecture, place, politics, design and displacement.
