Appropriate as a supplemental text for conceptual recitation/tutorial sections of introductory undergraduate physics courses. This landmark book presents a series of physics tutorials designed by a leading physics education researcher. Emphasizing the development of concepts and scientific reasoning skill, the tutorials focus on the specific conceptual and reasoning difficulties that students tend to find the most difficult. This is a Preliminary Version offering tutorials for a range of topics is Mechanics, E & M, Waves & Optics. The complete tutorials will be published in 1999.

Lecture-Tutorials for Introductory Astronomy provides a collection of 44 collaborative learning, inquiry-based activities to be used with introductory astronomy courses. Based on education research, these activities are "classroom ready" and lead to deeper, more complete understanding through a series of structured questions that prompt you to use reasoning and identify and correct their misconceptions. All content has been extensively field tested and six new tutorials have been added that respond to reviewer demand, numerous interviews, and nationally conducted workshops.

A true story that describes the first successful school model where all children excel; it shows how to find a child's interests, fuel interest into passion, and passion into brilliance. The book abounds in the success stories of children who achieved extraordinary accomplishments, many in spite of ADHD and learning disabilities, and all before the age of eighteen. Original.
