Conversions.

The new second edition of Reinforced Plastics Handbook has been completely revised and updated to reflect changes, new techniques and components and provides new information including:

- Thermosetting resins: polyesters, vinyl esters, high performance resins.
- Reinforced thermoplastics: low warpage, hydrolysis-resistant grades, new forms of glass fibre, natural resins and fibres.
- Major extensions on liquid crystal polymers, long fibre reinforced thermoplastics, polyurethanes and core materials.
- Major additions to moulding/processing technology: latest developments in RTM, SCRIMP.
- An enlarged chapter on design and applications to include extended data on sandwich constructions and polyurethane (reinforced reaction injection moulding).
- The latest legislation including consumer safety (flame retardency, toxicity) and safety in the workplace (styrene emission control, solvents, low dust reduced allergy materials).

In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.
