Republics and empires provides transnational perspectives on the significance of Italy to American art and visual culture and the impact of the United States on Italian art and popular culture. Covering the period from the Risorgimento to the Cold War, it reveals the complexity of the visual discourses that bound two relatively new nations together. It also gives substantial attention to literary and critical texts that addressed the evolving cultural relationship between Italy and the United States. While American art history has tended to privilege French, British and German ties, these chapters highlight a rich body of contemporary research by Italian and American scholars that moves beyond a discussion of influence as a one-way directive towards a deeper understanding of cultural transactions that profoundly affected the artistic expression of both nations.

139 (February - March, 1923)

Student, collaborator and lifelong friend of Enrico Fermi, Emilio Segrè presents a rich, well-rounded portrait of the scientist, his methods, intellectual history, and achievements. Explaining in nontechnical terms the scientific problems Fermi faced or solved, *Enrico Fermi, Physicist* contains illuminating material concerning Fermi's youth in Italy and the development of his scientific style. Emilio Segre was awarded the Nobel Prize for Physics in 1959.

During World War II resistance movements arose in all countries occupied by fascist and Nazi forces. Many people are startled to learn that there was a resistance movement in Italy. Most accounts by American scholars concentrate on the resistance in Central and Northern Italy and summarily dismiss the South. *For Love and Country* has as its focus the resistance movement in Lazio and in particular Rome. The author, Patrick Gallo, argues that a well-organized and mass-based resistance movement developed in Lazio. He contends that the Rome-based resistance not only undermined German morale but also achieved important strategic objectives. This study is based on a series of in-depth

interviews with the men and women who took part in the resistance in Lazio. Gallo analyzes the motivation of those who joined the resistance and their political, military and strategic roles in the movement. With the drama of war and Nazi occupation as a backdrop, the author paints a vivid picture of the life of a partisan.

Between the eleventh and thirteenth centuries, Venice transformed itself from a struggling merchant commune to a powerful maritime empire that would shape events in the Mediterranean for the next four hundred years. In this magisterial new book on medieval Venice, Thomas F. Madden traces the city-state's extraordinary rise through the life of Enrico Dandolo (c. 1107-1205), who ruled Venice as doge from 1192 until his death. The scion of a prosperous merchant family deeply involved in politics, religion, and diplomacy, Dandolo led Venice's forces during the disastrous Fourth Crusade (1201-1204), which set out to conquer Islamic Egypt but instead destroyed Christian Byzantium. Yet despite his influence on the course of Venetian history, we know little about Dandolo, and much of what is known has been distorted by myth. The first full-length study devoted to Dandolo's life and times, *Enrico Dandolo and the Rise of Venice* corrects the many misconceptions about him that have accumulated over the centuries, offering an accurate and incisive assessment

of Dandolo's motives, abilities, and achievements as doge, as well as his role—and Venice's—in the Fourth Crusade. Madden also examines the means and methods by which the Dandolo family rose to prominence during the preceding century, thus illuminating medieval Venice's singular political, social, and religious environment. Culminating with the crisis precipitated by the failure of the Fourth Crusade, Madden's groundbreaking work reveals the extent to which Dandolo and his successors became torn between the anxieties and apprehensions of Venice's citizens and its escalating obligations as a Mediterranean power.
