Matteo Salvini. Italy, Europe and the New Right - Alessandro Franzini 2019-04-10

Matteo Salvini is one of the most controversial up-and-coming figures on the European political scene. Since 2013 he has been the leader of Italian Lega - formerly a secessionist party which he himself transformed into the champion of the new nationalist right, a pendulum between Putin and Trump. In 2018 he became both the Vice-Prime Minister and the Minister of the Interior in a coalition government with the populist Five Star Movement. Accused of racism, Salvini has built his success on the social disorientation created by globalization and on the fear of immigration, using an aggressive and irreverent media campaign. But it's also thanks to his political ability, developed during his long militancy in the party, which began when he was 17 years old, that he was able to recognize before others the new spirit of the times. According to most people, after the election in 2018, Salvini had in reality become the leader of Italian politics, with the goal of heading the nationalist front in Brussels after the European elections in May of 2019, and then, the next Italian government. This book is a map that seeks to answer one simple question: who is Matteo Salvini, really?

Introduction to Linear Algebra - Gilbert Strang 2009-02-10

This leading textbook for first courses in linear algebra comes from the hugely experienced MIT lecturer and author Gilbert Strang. The book's tried and tested approach is direct, offering practical explanations and examples, while showing the beauty and variety of the subject. Unlike most other linear algebra textbooks, the approach is not a repetitive drill. Instead it inspires an understanding of real mathematics. The book moves gradually and naturally from numbers to vectors to the four fundamental subspaces. This new edition includes challenge problems at the end of each section. Preview five complete sections at math.mit.edu/linearalgebra. Readers can also view freely available online videos of Gilbert Strang's 18.06 linear algebra course at MIT, via OpenCourseWare (ocw.mit.edu), that have been watched by over a million viewers. Also on the web (<http://web.mit.edu/18.06/www/>), readers will find years of MIT exam questions, MATLAB help files and problem sets to practise what they have learned.
