Mahatma Gandhi and Mass Media - Teresa Joseph 2021-08-12

This book explores Gandhi's engagement with print news media. It examines how Gandhi, the man and his message, negotiated with the sociopolitical circumstances of his milieu and the methods of communication that he adopted

towards this end. It analyses the role that he played in building up alternative modes of communication in South Africa and India. This volume elucidates his interactions with the colonial communication order and his contestations of the same through various methods that included setting up new journals

and newspapers and taking on the role of writer, journalist, editor, and publisher. It unveils Gandhi's engagement with mass media and print journalism, particularly concerning issues of conflict and conflict resolution, as well as social transformation right from his days in London to the last days of his life. A significant contribution to scholarship on Mahatma Gandhi, this volume will be of great interest to scholars of politics, media and cultural studies, history, and South Asian studies.

An Islamic Jihad of Nonviolence - Salih Sayilgan
2019-01-21

Today Islam is often associated with violence, more so than other world religions. In the center of this reception of Islam is the concept of jihad, which has been distorted by many. On the one hand, there are some Muslims who take jihad as a reference point for their violent crimes against innocent people. On the other hand, the concept is intentionally used to promote fear against Islam and its adherents. This study challenges

these presentations of jihad by exploring the late Muslim theologian Said Nursi's jihad of nonviolence. The book shows how Nursi's teaching concerning nonviolent struggle, reconciliation, and religious tolerance has much in common with Nelson Mandela, Mahatma Gandhi, as well as Martin Luther King Jr.

Political Culture, Soft Interventions and Nation Building - Tiffany Jenkins 2016-01-13

This book raises questions about cultural interventions, an area of investigation somewhat overlooked in place of developing a critique of political interventions. Whilst political interventions are more explicit, coercive, and have a wide-reaching impact, it is important also to examine the way culture is used in attempts to reconstruct society and peoples - the 'soft' side of statebuilding, where heritage is utilised to play a role in the construction of the nation and the people, in memory and identity. For it can play a role in legitimizing myths and identifying symbolic, historic events, and implicitly informs the construction of

infrastructure, institutions, and other aspects of civic life. Contributors from the fields of politics, anthropology, archaeology, and sociology examine interventions in state and nation building through cultural methods, the 'soft' side of statebuilding, including the preservation and promotion of certain heritage, the politics of remembrance and monument building, and the repatriation of human remains and artefacts to communities in the name of making reparations for past atrocities. These are timely contributions. Heritage and cultural is too often considered in terms of how tourism might contribute to the economy post-conflict, neglecting the construction of meaning and memory through decisions about what is preserved or not. It will be of special interest to those in the field of cultural studies, archaeology, and politics as well as international relations. This book was published as a special issue of the *Journal of Intervention and Statebuilding*.

Gandhi's Body - Joseph S. Alter 2011-06-07

No single person is more directly associated with India and India's struggle for independence than Mahatma Gandhi. His name has equally become synonymous with the highest principles of global equality, human dignity, and freedom. Joseph Alter argues, however, that Gandhi has not been completely understood by biographers and political scholars, and in *Gandhi's Body* he undertakes a reevaluation of the Mahatma's life and thought. In his revisionist and iconoclastic approach, Alter moves away from the usual focus on nonviolence, peace, and social reform and takes seriously what most scholars who have studied Gandhi tend to ignore: Gandhi's preoccupation with sex, his obsession with diet reform, and his vehement advocacy for naturopathy. Alter concludes that a distinction cannot be made between Gandhi's concern with health, faith in nonviolence, and his sociopolitical agenda. In this original and provocative study, Joseph Alter demonstrates

that these seemingly idiosyncratic aspects of Gandhi's personal life are of central importance to understanding his politics—and not only Gandhi's politics but Indian nationalism in general. Using the Mahatma's own writings, Alter places Gandhi's bodily practices in the context of his philosophy; for example, he explores the relationship between Gandhi's fasting and his ideas about the metaphysics of emptiness and that between his celibacy and his beliefs about nonviolence. Alter also places Gandhi's ideas and practices in their national and transnational contexts. He discusses how and why nature cure became extremely popular in India during the early part of the twentieth century, tracing the influence of two German naturopaths on Gandhi's thinking and on the practice of yoga in India. More important, he argues that the reconstruction of yoga in terms of European naturopathy was brought about deliberately by a number of activists in India—of whom Gandhi was only the most

visible—interested in creating a "scientific" health regimen, distinct from Western precedents, that would make the Indian people fit for self-rule. Gandhi's Body counters established arguments that Indian nationalism was either a completely indigenous Hindu-based movement or simply a derivative of Western ideals.

Gandhi in Political Theory - Anuradha Veeravalli
2016-04-15

Can Gandhi be considered a systematic thinker? While the significance of Gandhi's thought and life to our times is undeniable it is widely assumed that he did not serve any discipline and cannot be considered a systematic thinker. Despite an overwhelming body of scholarship and literature on his life and thought the presuppositions of Gandhi's experiments, the systematic nature of his intervention in modern political theory and his method have not previously received sustained attention. Addressing this lacuna, the book contends that

Gandhi's critique of modern civilization, the presuppositions of post-Enlightenment political theory and their epistemological and metaphysical foundations is both comprehensive and systematic. Gandhi's experiments with truth in the political arena during the Indian Independence movement are studied from the point of view of his conscious engagement with method and theory rather than merely as a personal creed, spiritual position or moral commitment. The author shows how Gandhi's experiments are illustrative of his theoretical position, and how they form the basis of his opposition to the foundations of modern western political theory and the presuppositions of the modern nation state besides envisioning the foundations of an alternative modernity for India, and by its example, for the world.

Gandhi & Churchill - Arthur Herman
2008-04-29

In this fascinating and meticulously researched book, bestselling historian Arthur Herman sheds

new light on two of the most universally recognizable icons of the twentieth century, and reveals how their forty-year rivalry sealed the fate of India and the British Empire. They were born worlds apart: Winston Churchill to Britain's most glamorous aristocratic family, Mohandas Gandhi to a pious middle-class household in a provincial town in India. Yet Arthur Herman reveals how their lives and careers became intertwined as the twentieth century unfolded. Both men would go on to lead their nations through harrowing trials and two world wars—and become locked in a fierce contest of wills that would decide the fate of countries, continents, and ultimately an empire. Gandhi & Churchill reveals how both men were more alike than different, and yet became bitter enemies over the future of India, a land of 250 million people with 147 languages and dialects and 15 distinct religions—the jewel in the crown of Britain's overseas empire for 200 years. Over the course of a long career, Churchill would do

whatever was necessary to ensure that India remain British—including a fateful redrawing of the entire map of the Middle East and even risking his alliance with the United States during World War Two. Mohandas Gandhi, by contrast, would dedicate his life to India's liberation, defy death and imprisonment, and create an entirely new kind of political movement: satyagraha, or civil disobedience. His campaigns of nonviolence in defiance of Churchill and the British, including his famous Salt March, would become the blueprint not only for the independence of India but for the civil rights movement in the U.S. and struggles for freedom across the world. Now master storyteller Arthur Herman cuts through the legends and myths about these two powerful, charismatic figures and reveals their flaws as well as their strengths. The result is a sweeping epic of empire and insurrection, war and political intrigue, with a fascinating supporting cast, including General Kitchener, Rabindranath Tagore, Franklin Roosevelt, Lord

Mountbatten, and Mohammed Ali Jinnah, the founder of Pakistan. It is also a brilliant narrative parable of two men whose great successes were always haunted by personal failure, and whose final moments of triumph were overshadowed by the loss of what they held most dear.

Infrastructures for Peace in Sub-Saharan

Africa - Mediel Hove 2019-06-14

Cultures of violence are characteristic of many countries in sub-Saharan Africa and attempts to move towards cultures of peace have often proved difficult and ineffectual. And yet, the wide variations in levels of violence within and between countries show that it is not inevitable; rather, it is the result of choices made at individual, community and societal levels. This book examines the potential of peace infrastructures as vehicles to strengthen and spread progress towards cultures of peace. Peace infrastructures vary hugely in sophistication and level. The examples examined in this book range from tiny structures which help resolve conflicts between individuals and within community organisations, peace committees which serve local communities, peace education and peace club programmes in schools, mediation mechanisms to prevent election violence and to ministries of peace to coordinate government and non-government

efforts in peacemaking and peacebuilding. The overall finding is that the development of peace infrastructures at all levels has great potential to build cultures of peace. 1. It is the only book available which documents the experience and potential of nonviolence in post-independence sub-Saharan Africa. 2. It makes a persuasive case for the development of various peace infrastructures in order to make peace sustainable. 3. It explains how strategic planning can be utilised, both to bring about change and to institutionalise it.

Gandhi - Kathleen Kudlinski 2012-03-13

A childhood biography of the great political and social leader. Mohandas K. Gandhi (1869-1948) studied law in England, then spent 20 years defending the rights of immigrants in South Africa. In 1914 he returned to India and became the leader of the Indian National Congress. Gandhi urged non-violence and civil disobedience as a means to independence from Great Britain, with public acts of defiance that

landed him in jail several times. In 1947 he participated in the postwar negotiations that led to Indian independence. He was shot to death by a Hindu fanatic in 1948. This childhood biography highlights the events that informed Gandhi's indomitable spirit.

Rethinking Gandhi and Nonviolent Relationality - Debjani Ganguly 2008-03-25

This book presents a rethinking of the world legacy of Mahatma Gandhi in this era of unspeakable global violence. Through interdisciplinary research, key Gandhian concepts are revisited by tracing their genealogies in multiple histories of world contact and by foregrounding their relevance to contemporary struggles to regain the 'humane' in the midst of global conflict. The relevance of Gandhian notions of ahimsa and satyagraha is assessed in the context of contemporary events, when religious fundamentalisms of various kinds are competing with the arrogance and unilateralism of imperial capital to reduce the world to a state of international lawlessness. Covering a wide and comprehensive range of topics such as Gandhi's vegetarianism and medical practice, his successes and failures as a litigator in South Africa, his experiments with communal living and his concepts of non-

violence and satyagraha. The book combines historical, philosophical, and textual readings of different aspects of the leader's life and works. Rethinking Gandhi in a New World Order will be of interest to students and academics interested in peace and conflict studies, South Asian history, world history, postcolonial studies, and studies on Gandhi.

Media and Nation Building in Twentieth-Century India - Kalyan Chatterjee 2019-09-09

This book profiles twentieth-century India

through the life and times of Ramananda Chatterjee - journalist, influencer, nationalist. Through a reconstruction of his history, the book highlights the oft-forgotten role of media in the making of the idea of India. It shows how early twentieth-century colonial India was a curious melee of ideas and people - a time of rising nationalism, as well as an influx of Western ideas; of unprecedented violence and compelling non-violence; of press censorship and defiant journalism. It shows how Ramananda Chatterjee navigated this world and went beyond the traditional definition of the nation as an entity with fixed boundaries to anticipate Benedict Anderson and Ernest Gellner. The volume also examines the wide reach and scope of his journals in English, Hindi and Bengali, which published the likes of Rabindranath Tagore, Subhash Bose, Abanindranath Tagore, Nandalal Bose, Ananda Coomaraswamy, the scientist J. C. Bose and Zhu Deh, the co-founder of the Chinese Red Army. He also published *India in Bondage*

by the American Unitarian minister J. T. Sunderland, which resulted in his arrest. An intriguing behind-the-scenes look of early twentieth-century colonial India, this book will be of great interest to scholars and researchers of history, modern South Asia and media and cultural studies.

Contemporary English-Language Indian Children's Literature - Michelle Superle
2011-05-09

Concurrent with increasing scholarly attention toward national children's literatures,

Contemporary English-language Indian Children's Literature explores an emerging body of work that has thus far garnered little serious critical attention. Superle critically examines the ways Indian children's writers have represented childhood in relation to the Indian nation, Indian cultural identity, and Indian girlhood. From a framework of postcolonial and feminist theories, children's novels published between 1988 and 2008 in India are compared with those from the United Kingdom and North America from the same period, considering the differing ideologies and the current textual constructions of childhood at play in each. Broadly, Superle contends that over the past twenty years an aspirational view of childhood has developed in this literature—a view that positions children as powerful participants in the project of enabling positive social transformation. Her main argument, formed after recognizing several overarching thematic and structural patterns in more than one hundred texts, is that the novels

comprise an aspirational literature with a transformative agenda: they imagine apparently empowered child characters who perform in diverse ways in the process of successfully creating and shaping the ideal Indian nation, their own well-adjusted bicultural identities in the diaspora, and/or their own empowered girlhoods. Michelle Superle is a Professor in the department of Communications at Okanagan College. She has taught children's literature, composition, and creative writing courses at various Canadian universities and has published articles in *Papers* and *IRCL*.

Aesthetics, Arts, and Politics in a Global World - Daniel Herwitz 2017-01-26

A different set of purposes define culture today than those that preoccupied the world in the immediate decades of decolonization. Focusing

on art and music in diverse parts of the world, Daniel Herwitz explores a world that has largely shifted from the earlier days of nationalism, decolonization and cultural exclusion, to one of global markets and networks. Using examples from India and Mexico to South Africa, Australia and China, Herwitz argues that the cultural politics and art being produced in these places are now post- postcolonial. Where the postcolonial downplayed formerly Eurocentric forms and celebrated art with national consciousness, the rules for 21st century cultural authenticity are quickly disappearing. Young people think of themselves in relation to global culture rather than nation-→-building; the project of producing a new and modern art for the incipient and rising postcolonial nation is out of date. By examining the shift in which art accesses the past and the rise of trends such as hitching consumer culture to celebrity forms and branding, Herwitz's original and engaging exploration of contemporary art captures the

ways in which art has given way to a new form of production, altering everything from the role of tradition and heritage in contemporary art to the terms of its vision and circulation.

Education and Social Change in South Asia -

Krishna Kumar 2007

Today education is a key factor for further development of most of the countries in South Asia, which after decades of independence are still lacking in literacy. The book focuses on the relationship between the state and society of South Asian countries, especially in the field of primary education. After dealing with developments under colonial rule, the major part of the contributions is devoted to the educational policy in South Asian countries post-independence. The papers reveal the relevance and crucial role of culture, religion, and ethnicity for imparting basic education on a nation-wide scale. Taking into consideration the complexity of societies of South Asian countries, the book looks at the social and political

implications arising out of the educational policy of the state for the process of nation building. The book is a specific contribution from a South Asian context to the ongoing debate about the relevance of language, culture, and religion in the educational policy of a majority population and its impact on minority communities.
