[Communication for Another Development](#) - Wendy Quarry 2013-07-04

This lively book argues that in the development process, communication is everything. The authors, world experts in this field as teachers, practitioners and theorists, argue that Communication for Development is a creative and innovative way of thinking that can permeate the overall approach to any development initiative. They illustrate their argument with vivid case studies and tools for the reader, drawing on the stories of individual project leaders who have championed development for communication, and using a range of situations to show the different possibilities in various contexts. Free from jargon, and keeping a close look at how development is actually being implemented at ground level, this book is an important contribution to development studies not just for students but also for development practitioners and policy makers.

The Canadian Rangers - P. Whitney Lackenbauer 2013-05-01

The Canadian Rangers stand sentinel in the farthest reaches of our country. For more than six decades, this dedicated group of citizen-soldiers has quietly served as Canada's eyes, ears, and voice in isolated coastal and northern communities. Drawing on official records, interviews, and participation in Ranger exercises, Lackenbauer argues that the organization offers an inexpensive way for Canada to "show the

flag" from coast to coast to coast. The Rangers have also laid the foundation for a successful partnership between the modern state and Aboriginal peoples, a partnership rooted in local knowledge and crosscultural understanding.

The Forgotten Songs of the Newfoundland Outports - Anna Kearney Guigné 2016-12-12

In 1951, musician Kenneth Peacock (1922-2000) secured a contract from the National Museum of Canada (today the Canadian Museum of History) to collect folksongs in Newfoundland. As the province had recently joined Confederation, the project was deemed a goodwill gesture, while at the same time adding to the Museum's meager Anglophone archival collections. Between 1951 and 1961, over the course of six field visits, Peacock collected 766 songs and melodies from 118 singers in 38 communities, later publishing two-thirds of this material in a three-volume collection, *Songs of the Newfoundland Outports* (1965). As the publication consists of over 1000 pages, *Outports* is considered to be a bible for Newfoundland singers and a valuable resource for researchers. However, Peacock's treatment of the material by way of tune-text collations, use of lines and stanzas from unpublished songs has always been somewhat controversial. Additionally, comparison of the field collection with *Outports* indicates that although Peacock acquired a range of material, his personal preferences frequently guided his publishing agenda. To ensure that the songs closely correspond to what the singers presented to Peacock, the collection has been prepared by drawing on Peacock's original music and textual notes and his original field recordings. The collection is far-ranging and eclectic in that it includes British and American broadsides, musical hall and vaudeville material alongside country and western songs, and local compositions. It also highlights the influence of popular media on the Newfoundland song tradition and contextualizes a number of locally composed songs. In this sense, it provides a key link between what Peacock actually recorded and the material he eventually published. As several of the songs have not previously appeared in the standard Newfoundland collections, *The Forgotten Songs* sheds new light on the extent of Peacock's collecting. The collection includes 125 songs arranged under 113 titles along with extensive notes on the songs, and brief biographies of the 58 singers. Thanks to the Research Centre for the Study of Music Media and Place, a video of the launch event, held in St. John's, Newfoundland, is available at

Lions or Jellyfish - Raymond B. Blake 2015-01-01

Asked in 2010 about his pugnacious approach to federal-provincial relations, Newfoundland premier Danny Williams declared "I would rather live one more day as a lion than ten years a jellyfish." He was only the latest in a long line of Newfoundland premiers who have fought for that province's interests on the national stage. From Joey Smallwood and the conflict over Term 29 of the Act of Union to Williams and his much-publicized clashes with Paul Martin and Stephen Harper, Newfoundland and Labrador's politicians have often expressed a determination to move beyond a legacy of colonialism and assert greater control over the province's own affairs. *Lions or Jellyfish?* examines the history of these federal-provincial clashes with both clarity and wit. Written by a noted expert on Newfoundland politics and intergovernmental affairs in Canada, this book studies a vital but frequently overlooked aspect of modern Canadian federalism.

Canadian Literary Landmarks - John Robert Colombo 1984-01-01

Here is a list of three dozen of the top literary locales in the country. The

selection of sites is necessarily subjective, yet it attempts to represent geographical, historical, social, and cultural concerns as well as strictly literary interests. Had this list been prepared by the editors of Michelin Guide, they would have added asterisks or stars to the entries: * Interesting. ** Worth a detour. *** Worth a journey. It is the opinion of the author of Canadian Literary Landmarks that all thirty-six sites are "Worth a journey." It is recognized that the average person is unlikely to visit No. 1, not to mention No. 36, but as these sites happen to be the first and last entries in the book, they mark a convenient and symbolic beginning and ending. (No. 1 being L'Anse aux Meadows, Epaves Bay, Nfld. and No. 36 being the North Pole, NWT).

The Placentia Area - A Changing Mosaic - Lee K.M. Everts 2016-02-27
Touching on the wide array of people and events who have brought life to the history of the Placentia area, The Placentia Area - A Changing Mosaic offers a glimpse of the deep history that has transformed this part of Newfoundland and Labrador. The history is a collection of interconnected stories. Geological processes forged a landscape that would feature in later actions and activities. Geology created a wide expansive beach that Basque fish harvesters discovered was perfect for drying fish. This attribute, along with its deep harbour, then ensured that Placentia would go on to function in the struggles between the French and English. And from this period, the Placentia area has evolved, playing a role in the lives of well-known characters such as Pierre le Moyne d'Iberville or Roger F. Sweetman, as well as the less known, yet equally important, women and men who simply came to make a life for themselves. To the present day, the latter has remained a defining quality of the region.

Cod - George A. Rose 2007

The devastation of many of the greatest North Atlantic cod stocks, particularly those of Newfoundland and Labrador and the Grand Banks, has become an icon for the unsustainable relation between human exploitation and Nature. Here, George Rose tells the full story of that devastation, in scientific detail, for the first time - from the formation of the North Atlantic marine ecosystems to the massive stock declines in the last half of the 20th century. Politics and the fisheries are inextricably entwined. In Cod, Rose recounts the many political influences on the fisheries over several centuries and describes how neglect from the late 1800s onward led to insufficient scientific knowledge and little protection for the stocks when massive Euro-Russian fleets targeted the Grand Banks after World War II, destroying the most prolific fishery the world has known. Cod is no armchair account, but a controversial one that includes original information on the North Atlantic fisheries.
