America. Non il mondo delle favole ma le favole del mondo - Lilli Pansini 1999

The Girl Who Trod on the Loaf - Hans Christian Andersen
2020-06-29

Inger was a little girl but she was a bad person. This was obvious even when she was very small: she enjoyed catching insects and tearing off their wings without any pity for the poor creatures. When she was a bit bigger, her parents

sent her to the country to a good family. Here, she became very refined and, going to visit her parents, decided to walk on her bread rather than in the marsh so she would not dirty her shoes. And this is where her real story begins... Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Celebrated for children's literature, his most cherished fairy tales include "The Emperor's New Clothes", "The Little Mermaid", "The Nightingale", "The Steadfast Tin Soldier", "The Snow Queen", "The Ugly Duckling" and "The Little Match Girl". His books have been translated into every living language, and today there is no child or adult that has not met Andersen's whimsical characters. His fairy tales have been adapted to stage and screen countless times, most notably by Disney with the animated films "The Little Mermaid" in 1989 and "Frozen", which is loosely based on "The Snow Queen", in 2013. Thanks to Andersen's contribution to children's

literature, his birth date, April 2, is celebrated as International Children's Book Day.

Pronti per la scuola primaria - Stefania Mei
2015-01-01

Il passaggio dalla scuola dell'infanzia alla scuola primaria costituisce una tappa fondamentale nello sviluppo linguistico del bambino. Non sempre, però, le competenze che dovrebbero essere state già acquisite e consolidate in età prescolare (ossia le abilità di percezione uditiva e visiva, metafonologiche, grafomotorie e semantico-lessicali) risultano effettivamente raggiunte da tutti gli alunni. Questo volume propone una serie di proposte operative che favoriscono l'allenamento e il consolidamento di questi prerequisiti. Grazie alle schede con attività graduate per difficoltà crescente e aderenti alle conoscenze assimilate nel quotidiano dai piccoli alunni, l'operatore (insegnante, educatore, logopedista, terapeuta della neuropsicomotricità dell'età

evolutiva, ecc.) o il genitore potrà organizzare un percorso didattico personalizzato nel rispetto delle esigenze del bambino, strutturato nelle seguenti aree: • percettivo-uditiva • metafonologica • grafomotoria • percettivo-visiva • semantico-lessicale. Pronti per la scuola primaria, pensato principalmente per i bambini dell'ultimo anno della scuola dell'infanzia, può essere un valido strumento anche per bambini del primo anno della primaria che evidenzino lacune in una o più aree o che incontrino difficoltà nell'avviare i processi di lettura-scrittura.

Chess Tactics Workbook for Kids - John Nunn 2019-07-08

This is a book for those who know the rules of chess and are keen to start winning games. The quickest way to improve your chess is to learn tactics. But not just knowing the themes - you need to get used to using them in real positions. Master tactician John Nunn has thoughtfully crafted a course that gives you the basic nuggets of knowledge and immediately invites you to start finding tactical ideas for yourself. Chess Tactics Workbook for Kids is the first in a new series of books that help players gain chess skills

by tackling hundreds of carefully chosen exercises. The themes are similar to those in Gambit's best-selling 'Chess for Kids' series, but the focus is on getting vital hands-on experience. Many positions build on ones given earlier, showing how advanced ideas are normally made up of simpler ones that we can all grasp. Each chapter introduces a basic theme and features dozens of exercises, with solutions that highlight the key points. In each chapter there are tips on what to look out for to help spot tactical ideas. As the chapters progress, we increasingly see how tactical ideas are combined together, with ideas from previous sections repeatedly appearing as part of a deadly one-two punch. The book ends with a series of six test papers where you are given no clues about the themes involved. Dr John Nunn is one of the best-respected figures in world chess. He was among the world's leading grandmasters for nearly twenty years and won four gold medals in chess

Olympiads. In 2004, 2007 and 2010, Nunn was crowned World Chess Solving Champion, ahead of many former champions.

Un romanzo, un diario, un paradossale manuale per trovare se stessi: innovativo, sorprendente, duro, nel raccontare l'irrequietezza, l'amore e il turbamento di una giovane donna del nuovo millennio. «La novità del romanzo di Sheila Heti e di una serie come Girls è il modo in

cui le relazioni con gli uomini sono diventate secondarie rispetto alla profondità dell'amicizia femminile. Sono le altre donne e non gli uomini che più influenzano la nostra trasformazione da ragazze in donne. Sono le donne e non gli uomini che ci forniscono le opportunità per esprimerci e per comprendere noi stesse» (The New Yorker).

The Story of the Year - Hans Christian Andersen 2020-11-18

The new year had begun and January was already nearing its end, but it was still very cold. The sparrows found it strange, that the men had declared that it was the new year, as everyone knows that the year only begins with the coming of spring. However, spring was late and a few intrepid sparrows decided to go looking for it. Hans Christian Andersen (1805-1875) was a Danish author, poet and artist. Flatland - Edwin A. Abbott
2006-07-13

'Upward, yet not Northward.' How would a creature limited to two dimensions be able to grasp the possibility of a third? Edwin A. Abbott's droll and delightful 'romance of many dimensions' explores this conundrum in the experiences of his protagonist, A Square, whose linear world is invaded by an emissary Sphere bringing the gospel of the third dimension on the eve of the new millennium. Part geometry lesson, part social satire, this classic work of science fiction brilliantly succeeds in enlarging all readers' imaginations beyond the limits of our 'respective dimensional prejudices'. In a world where class is determined by how many sides you possess, and

women are straight lines, the prospects for enlightenment are boundless, and Abbott's hypotheses about a fourth and higher dimensions seem startlingly relevant today. This new edition of Flatland illuminates the social and intellectual context that produced the work as well as the timeless questions that it raises about the limits of our perception and knowledge.

Paint by Sticker Kids -
Workman Publishing
2016-04-05

Move over, coloring books!
Here's an entirely new craft
that kids will love: Paint by

Sticker Kids. Paint by Sticker Kids is the same compelling craft first introduced in Paint by Sticker, but just for kids! The book includes everything you need to create 10 bright, playful, full-color illustrations—illustrated templates printed on perforated card stock, and 10 pages of stickers to fill in and create the artwork. The fun, vibrant images are rendered in “low-poly,” a computer graphics style using geometric polygon shapes to create a 3-D effect. As in paint-by-number, each template is divided into hundreds of spaces, each with a number that corresponds to a particular sticker. Find the sticker, peel it, and place it in the right space. Add the next, and the next, and the next and voila! It’s a rocket ship blasting through space. A Tyrannosaurus rex prowling his domain. A pickup truck hauling its load. A friendly toucan

hanging on his perch. Kids will love watching these pictures come to life. Plus, each is suitable for framing or the fridge.
