Montaigne & Melancholy - Michael Andrew Screech 2000

Montaigne (1533-1592), the personification of philosophical calm, had to struggle to become the wise Renaissance humanist we know. His balanced temperament, sanguine and melancholic, promised genius but threatened madness. When he started his Essays, Montaigne was upset by an attack of melancholy humor: He became temperamental and unbalanced. Writing about himself restored the balance but broke an age-old taboo—happily so, for he discovered profound truths about himself and about our human condition. His charm and humor have made his writings widely enjoyed and admired.

Evaluate Your Synastry - Ciro Discepolo 2012-02-08

This short book intends to suggest to the Reader a practical method to evaluate, making some comparisons, the potentialities of a synastry: as regards love, business, studies and other. This method is based first of all on the teachings of Tradition and after on the contributions that comparative studies have offered to our discipline, for example the statistical study of Carl Gustav Jung and of the Nobel Prize for Physics Wolfgang Pauli about the excellence of the conjunction Sun-Moon in a couple. Personally, for many years I studied also the mid-points between

the skies of two subjects, but I did not get valid results. As in all books of mine you will find some or many practical examples and most of all the way to test what I suggest on your personal examples: try this method on yourselves, on your past experiences, on the couples that you know very well and that you have known for a long time. If this system convinces you, use it. Otherwise throw the book away. If I may praise shortly this book, I'd like to add that probably it is the first example, or one of the first examples, of collaboration between an astrologer that practises the Judicial Astrology (or Predictive Astrology or Astrologia Gallica of Morin de Villefranche and of André Barbault) and the Astrology of an expert colleague, Danila Madau Perra, who teaches Yoga and is Buddhist, but who accepts, approves of and also practices Aimed Solar Returns. In short: a true example of an attempt to study Astrology in a holistic way.

Body Art and Performance - Lea Vergine 2000

When *The Body as Language* ("Body-art" and Performance) appeared in 1974, it was immediately a huge publishing hit, reviewed by some of the most influential art historians and writers (Giulio C. Argan, Edoardo

Sanguineti, Max Kozloff, Lucy Lippard, François Pluchart, Peter Gorsen, Evelyn Weiss and many others). A direct testimony of the birth and development of one of the most controversial art trends, Lea Vergine's book avails of a series of texts by the artists themselves, whom the author had asked to contribute with a statement about the illustrations of their work. Featuring a thorough documentation of original photographs and film photograms, videotapes, happenings, actions and performances, the book analyses the evolution of this phenomenon through the works of sixty artists, including Gina Pane, Gilbert & George, Urs Lüthi and Katharina Sieverding, Rebecca Horn, Trisha Brown, Günter Brus and many others who have worked with and on the body. In an absolutely unusual publishing event, nearly thirty years after the first edition, the text--by now a classic--is republished with all the original photographic material. The volume is enhanced and brought up-to-date by an afterword by Lea Vergine, who observes the changes of Body Art throughout the nineties: Orlan, Stelarc, Ron Athey, Franko B., Yasumasa Morimura, Jana Sterbak, Matthew Barney are "virtuosos of disorder and hungry for afflictions of any and every kind, mystics--like persons who display the subjection of their bodies to cruel and invasive devices, or who revel in virtual fantasies of such self-inflicted pains--destroy themselves in order newly to find themselves. . . . They finally pay a visit to the world of the saints and victims, exploring and prolonging its seductions." The Beginnings of Western Science - David C. Lindberg 2010-02-15
When it was first published in 1992, *The Beginnings of Western Science* was lauded as the first successful attempt ever to present a unified account of both ancient and medieval science in a single volume. Chronicling the development of scientific ideas, practices, and institutions from pre-Socratic Greek philosophy to late-Medieval scholasticism, David C. Lindberg surveyed all the most important themes in the history of science, including developments in cosmology, astronomy, mechanics, optics, alchemy, natural history, and medicine. In addition, he offered an illuminating account of the transmission of Greek science to medieval Islam and subsequently to medieval Europe. *The Beginnings of Western Science* was, and remains, a landmark in the history of science, shaping the way students and scholars understand these critically formative periods of scientific development. It reemerges here in a second edition that includes revisions on nearly every page, as well as several sections that have been completely rewritten. For example, the section on Islamic science has been thoroughly retooled to reveal the magnitude and sophistication of medieval Muslim scientific achievement. And the book now reflects a sharper awareness of the importance of Mesopotamian science for the development of Greek

astronomy. In all, the second edition of *The Beginnings of Western Science* captures the current state of our understanding of more than two millennia of science and promises to continue to inspire both students and general readers.

Augmented Urban Spaces - Fiorella De Cindio 2016-04-08

There have been numerous possible scenarios depicted on the impact of the internet on urban spaces. Considering ubiquitous/pervasive computing, mobile, wireless connectivity and the acceptance of the Internet as a non-extraordinary part of our everyday lives mean that physical urban space is augmented, and digital in itself. This poses new problems as well as opportunities to those who have to deal with it. This book explores the intersection and articulation of physical and digital environments and the ways they can extend and reshape a spirit of place. It considers this from three main perspectives: the implications for the public sphere and urban public or semi-public spaces; the implications for community regeneration and empowerment; and the dilemmas and challenges which the augmentation of space implies for urbanists. Grounded with international real-life case studies, this is an up-to-date, interdisciplinary and holistic overview of the relationships between cities, communities and high technologies.

Obsolete Objects in the Literary Imagination - Francesco Orlando
2008-10-01

Translated here into English for the first time is a monumental work of literary history and criticism comparable in scope and achievement to Eric Auerbach's *Mimesis*. Italian critic Francesco Orlando explores Western literature's obsession with outmoded and nonfunctional objects (ruins, obsolete machinery, broken things, trash, etc.). Combining the insights of psychoanalysis and literary-political history, Orlando traces this obsession to a turning point in history, at the end of eighteenth-century industrialization, when the functional becomes the dominant value of Western culture. Roaming through every genre and much of the history of Western literature, the author identifies distinct categories into which obsolete images can be classified and provides myriad examples. The function of literature, he concludes, is to remind us of what we have

lost and what we are losing as we rush toward the future.

Posthumous People - Massimo Cacciari 1996

Cacciari discusses Vienna at a crucial turning point in Western thinking, as the 19th century ended, treating this extraordinarily rich concentration of people and events as the hub upon which wheeled into the 20th century.

The Living God and the Fullness of Life - Jürgen Moltmann 2015-11-06
Modern humanity has accepted a truncated, impoverished definition of life. Focusing solely on material realities, we have forgotten that joy, purpose, and meaning come from a life that is both immersed in the temporal and alive to the transcendent. We have, in other words, ceased to live in God. In this book, renowned theologian Jürgen Moltmann shows us what that life of joy and purpose looks like. Describing how we came to live in a world devoid of the ultimate, he charts a way back to an intimate connection with the biblical God. He counsels that we adopt a "theology of life," an orientation that sees God at work in both the mundane and the extraordinary and that pushes us to work for a world that fully reflects the life of its Creator. Moltmann offers a telling critique of the shallow values of consumerist society and provides a compelling rationale for why spiritual sensibilities and encounter with God must lie at the heart of any life that seeks to be authentically human.

The Forgotten Revolution - Lucio Russo 2013-12-01

The period from the late fourth to the late second century B. C. witnessed, in Greek-speaking countries, an explosion of objective knowledge about the external world. While Greek culture had reached great heights in art, literature and philosophy already in the earlier classical era, it is in the so-called Hellenistic period that we see for the first time — anywhere in the world — the appearance of science as we understand it now: not an accumulation of facts or philosophically based speculations, but an organized effort to model nature and apply such models, or scientific theories in a sense we will make precise, to the solution of practical problems and to a growing understanding of nature. We owe this new approach to scientists such as Archimedes, Euclid, Eratosthenes and many others less familiar today but no less remarkable.

Yet, not long after this golden period, much of this extraordinary development had been reversed. Rome borrowed what it was capable of from the Greeks and kept it for a little while yet, but created very little science of its own. Europe was soon smothered in the obscurantism and stasis that blocked most avenues of intellectual development for a thousand years — until, as is well known, the rediscovery of ancient culture in its fullness paved the way to the modern age.

Dante - Alessandro Barbero 2022-01-04

Dante brings the legendary author—and the medieval Italy of his era—to vivid life, describing the political intrigue, battles, culture, and society that shaped his writing. Dante Alighieri's *Divine Comedy* has defined how people imagine and depict heaven and hell for over seven centuries. However, outside of Italy, his other works are not well known, and less still is generally known about the context he wrote them in. In *Dante*, Barbero brings the legendary author's Italy to life, describing the political intrigue, battles, city and society that shaped his life and work. The son of a shylock who dreams of belonging to the world of writers and nobles, we follow Dante into the dark corridors of politics where ideals are shattered by rampant corruption, and then into exile as he travels Italy and discovers the extraordinary color and variety of the countryside, the metropolises, and the knightly courts. This is a book by a serious scholar with real popular appeal, as evidenced by its bestseller ranking in Italy. It is a remarkable piece of forensic investigation into medieval Italian life.

Complex/Archetype/Symbol in the Psychology of C.G. Jung - Jolande Jacobi 2020-05-26

As an associate of C. G. Jung for many years, Jolande Jacobi is in a unique position to provide an interpretation of his work. In this volume, Dr. Jacobi presents a study of three central, interrelated concepts in analytical psychology: the individual complex, the universal archetype, and the dynamic symbol.

Le ketubbot di Monte San Savino - Stefania Roncolato 2009

Julian the Apostate - Gaetano Negri 1905

A City in Search of an Author - Katia Pizzi 2002-02-01

Poised between the Mediterranean and the Mitteleuropa, crossroads of civilizations and seat of vibrant cultural and literary life, Trieste is now acknowledged as enjoying unrivalled cultural status amongst Italian cities. This volume, the first comprehensive study of Triestine literature in English, originally reassesses Trieste's literary identity, paying particular attention to the period between 1918 and 1954 when local writing became intensely aware of its local specificity and some of its central motifs came prominently to the fore. Trieste's singular border identity, mirrored in a variegated literary output, emerges here as laden with complexities and ambiguities, such as the controversial notion of *triestinita*, the ambiguous relation with nationalism, specifically in its Fascist inflection, and the anxieties generated by repeated re-definitions of the area's historical borders.

The Nature and Mission of Theology - Cardinal Joseph Ratzinger 2016-06-21

As Cardinal, Joseph Ratzinger wrote this book in response to the dialogue going on today concerning theology and the clarification of its methods, its mission and its limits which he thinks has become urgent. Ratzinger states: "To do theology-as the Magisterium understands theology-it is not sufficient merely to calculate how much religion can reasonably be expected of man and to utilize bits and pieces of the Christian tradition accordingly. Theology is born when the arbitrary judgment of reason encounters a limit, in that we discover something which we have not excogitated ourselves but which has been revealed to us. For this reason, not every religious theory has the right to label itself as Christian or Catholic theology simply because it wishes to do so; whoever would lay claim to this title is obligated to accept as meaningful the prior given which goes along with it."

History, Prophecy, and the Stars - Laura Ackerman Smoller 2017-03-14
Although astrology was viewed with suspicion by the medieval church, it became a major area of inquiry for the renowned cardinal and scholar Pierre d'Ailly, whose astrological and apocalyptic writings had a significant influence on Christopher Columbus. D'Ailly's writings on the

stars, the focus of this book, clearly illustrate the complex relationships among astrology, science, and Christian thinking in the late Middle Ages. Through an examination of his letters, sermons, and philosophical, astrological, and theological treatises, Laura Ackerman Smoller reveals astrology's appeal as a scientific means to interpret history and prophecy, and not merely as a magical way to forecast and manipulate one's own fate. At the same time, she shows how d'Ailly dealt with delicate problems--such as free will and God's omnipotence--in elevating astrology to a compelling, but not always consistent, "natural theology." The French cardinal's most intriguing prediction was for the advent of Antichrist in 1789, one that stemmed from his deep concern over the Great Schism (1378-1414). Smoller maintains that the division in the church led d'Ailly to fear the imminence of the apocalypse, and that he eventually turned to astrology to quell his apocalyptic fears, thereby gaining confidence that a church council could heal the Schism. In elucidating the place of astrology in medieval society, this book also affords a personal glimpse of a man facing a profound crisis. Originally published in 1994. The Princeton Legacy Library uses the latest print-on-demand technology to again make available previously out-of-print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

Blockade Diary - Lidia Ginzburg 1995

A fictionalized account of the 900-day siege of Leningrad during World War II, describing the day-to-day business of finding something to eat while avoiding bombs and shells. The siege cost 600,000 lives.

Notes Without a Text and Other Writings - Roberto Bazlen 2019-05

An advisor to Italian publishing houses, a translator of Freud and Jung, a friend of Montale and Calvino, Roberto Bazlen was nothing if not a literary man, but kept his writings to himself. Here, translated into English for the first time, the reader will discover Bazlen's private oeuvre: an unfinished novel, *The Sea Captain*, which bears comparison with the fiction of Kafka and Beckett; a selection of entries from his notebooks dealing with topics as various as whether or not there is an "animal Jahweh" and the aesthetic limitations of the cinema; a trio of essays on his native city of Trieste; and a sampling of his editorial letters. *Notes Without a Text* is an introduction to the work of one of the unknown masters of twentieth-century European literature.

The Physical World of the Greeks - S. Sambursky 1956

Kwaidan - Lafcadio Hearn 2021-05-07

Kwaidan: Stories and Studies of Strange Things features several Japanese ghost stories and a brief non-fiction study on insects. Most of these stories were translated from old Japanese texts. The author also states that one of the stories - *Yuki-onna* - was told to him by a farmer in Musashi Province, and his was apparently the first record of it. *Riki-Baka* is based on a personal experience of the author. Table of Contents: *The Story of Mimi-nashi Hōichi Oshidori* *The Story of O-Tei Ubazakura* *Diplomacy Of a Mirror and a Bell* *Jikininki Mujina* *Rokurokubi* *A Dead Secret* *Yuki-Onna* *The Story of Aoyagi Jiu-Roku-Zakura* *The Dream of Akinosuke Riki-Baka* *Hi-Mawari Hōrai* In the last half of the book, Hearn lists collected Chinese/Japanese superstitions and his own personal thoughts on various members of the insect world. Butterflies:

Personification of the human soul. Mosquitoes: Karmic reincarnation of jealous or greedy people in the form of Jiki-ketsu-gaki or "blood-drinking pretas". Ants: Mankind's superior in terms of chastity, ethics, social structure, longevity and evolution.

Language, Quantum, Music - Roberto Giuntini 1999-08-31

Selected Contributed Papers of the Tenth International Congress of Logic, Methodology and Philosophy of Science, Florence, August 1995

Separate Rooms - Pier Vittorio Tondelli 2004

Leo is an Italian writer in his thirties. Thomas, his German lover, is dead. On a plane to Munich, Thomas's home town, Leo slips into a reverie of their meeting and life in Paris, nights in Thomas's flat in Montmartre and a desperate, drug-induced flight through the forests of northern France that spells the end for Leo and Thomas' languid, erotic life together. Leo travels to find anonymity. Structured in three musical movements, *Separate Rooms* is a story of ideal love, broken by absence and separation. When Thomas was alive, he and Leo had separate rooms in order to preserve the urgency of their passion. Now, Leo faces solitude, the impossible striving of memory to recreate life and the hostility of a prejudiced world. *Separate Rooms*, Tondelli's last book, is a powerful novel of the strength of love and the trauma of death.

I nodi lunari e la luna nera. Il loro significato astrologico - Marie-Thérèse de Longchamps 1997

Judicial Protection of Fundamental Rights on the Internet - Oreste Pollicino 2021-04-22

This book explores how the Internet impacts on the protection of fundamental rights, particularly with regard to freedom of speech and privacy. In doing so, it seeks to bridge the gap between Internet Law and European and Constitutional Law. The book aims to emancipate the debate on internet law and jurisprudence from the dominant position, with specific reference to European legal regimes. This approach aims to inject a European and constitutional "soul" into the topic. Moreover, the book addresses the relationship between new technologies and the protection of fundamental rights within the theoretical debate

surrounding the process of European integration, with particular emphasis on judicial dialogue. This innovative book provides a thorough analysis of the forms, models and styles of judicial protection of fundamental rights in the digital era and compares the European vision to that of the United States. The book offers the first comparative analysis in which the notion of (judicial) frame, borrowed from linguistic and cognitive studies, is systematically applied to the theories of interpretation and argumentation. With a Foreword by Robert Spano, President of the European Court of Human Rights.

Solar Returns: An Introduction - Sara Shipman

Did you know that every birthday the universe gifts you a new astrological chart that allows you to discover where your life is headed for the next twelve months? All you have to do is decode your Solar Return Chart to take control of events - and in this book, Sara Shipman tells you how. Solar Returns are one of the best tools of predictive astrology - and all the best tools are simple to use. In this book, Sara Shipman introduces you to Solar Return chart interpretation using a 'keywords' approach to analysing the planets, houses and rising sign in your Solar Return chart. To keep things easy, Sara bases her chart analyses in this book on four main questions - what, when, where and how - and the answers to those questions are written in your stars. In this book, Sara explains what a Solar Return forecast is, how it works and why it's different from your natal chart. She explains how Solar Returns work in cycles and looks at the question of timing your forecast. When can you expect to notice your new Solar Return chart taking effect? Is it an immediate noticeable change or does it overlap with the previous year's chart? These, and many other questions will be answered by Sara's in depth analysis of the planets, retrograde planets and astrological houses in your solar return chart. Sara also looks carefully at the importance of the rising sign in your Solar Return chart. The main objective of this book is, however, to provide you with the resources to begin making your own interpretations. So, to simplify matters, each section of the book has a full keywords list for each planet, house and rising sign to open up the full range of possibilities available to you when

interpreting your Solar Return chart. Sara Shipman is an astrologer, blogger and writer.

Oxford Studies in Epistemology - Tamar Szabo Gendler 2007-12-13

A New Model of the Universe - P. D. Ouspensky 2013-02

2013 Reprint of 1931 Edition. Exact facsimile of the original edition, not reproduced with Optical Recognition Software. In this classic work, Ouspensky analyzes certain of the older schools of thought from the East and the West, connecting them with modern ideas and explaining them in light of the most recent discoveries and speculations in newer schools of philosophy and religion. In the course of his research he integrates the theories of relativity, the fourth dimension and current psychological theories. The book closes with a consideration of the sex problem from the perspective of sex in relation to the evolution of man toward superman.
