The Mysterious Flame of Queen Loana - Umberto Eco 2006

Having suffered a complete loss of memory regarding every aspect of his own identity, rare book dealer Yambo withdraws to a family home nested between Milan and Turin, where he sorts through boxes of old records and experiences memories in the form of a graphic novel. By the author of Baudolino. Reprint. 75,000 first printing.

Zeno's Conscience - Italo Svevo 2003-02-04

Long hailed as a seminal work of modernism in the tradition of Joyce and Kafka, and now available in a supple new English translation, Italo Svevo's charming and splendidly idiosyncratic novel conducts readers deep into one hilariously hyperactive and endlessly self-deluding mind. The mind in question belongs to Zeno Cosini, a neurotic Italian businessman who is writing his confessions at the behest of his psychiatrist. Here are Zeno's interminable attempts to quit smoking, his courtship of the beautiful yet unresponsive Ada, his unexpected—and unexpectedly happy—marriage to Ada's homely sister Augusta, and his affair with a shrill-voiced aspiring singer. Relating these misadventures with wry wit and a perspicacity at once unblinking and compassionate, Zeno's Conscience is a miracle of psychological realism.

Dialect Poetry of Northern & Central Italy - Luigi Bonaffini 2001

The Book of Disquiet - Fernando Pessoa 2010-12-09

Sitting at his desk, Bernardo Soares imagined himself free forever of Rua dos Douradores, of his boss Vasques, of Moreira the book-keeper, of all the other employees, the errand boy, the post boy, even the cat. But if he left them all tomorrow and discarded the suit of clothes he wears, what else would he do? Because he would have to do something. And what suit would he wear? Because he would have to wear another suit. A self-deprecating reflection on the sheer distance between the loftiness of his feelings and the humdrum reality of his life, The Book of Disquiet is a classic of existentialist literature.

The Leopard - Giuseppe Di Lampedusa 2007-11-06

Set in the 1860s, The Leopard tells the spellbinding story of a decadent, dying Sicilian aristocracy threatened by the approaching forces of democracy and revolution. The dramatic sweep and richness of observation, the seamless intertwining of public and private worlds, and the grasp of human frailty imbue The Leopard with its particular melancholy beauty and power, and place it among the greatest historical novels of our time. Although Giuseppe di Lampedusa had long had the book in mind, he began writing it only in his late fifties; he died at age sixty, soon after the manuscript was rejected as unpublishable. In his introduction, Gioacchino Lanza Tomasi, Lampedusa's nephew, gives us a detailed history of the initial publication and the various editions that followed. And he includes passages Lampedusa wrote for the book that were omitted by the original Italian editors. Here, finally, is the definitive edition of this brilliant and timeless novel. (Translated from the Italian by Archibald Colquhoun.)

Oh Wow! I Saw Saturn! - Daniele Gasparri 2018-11-19

Astrophysicist Daniele Gasparri, bestseller author in Italy with 35 astronomy book published, presents its first translated book, a complete guide to learn how to observe the Universe. Economic B/W edition. When I begged my parents to give me a telescope for Christmas, way back in 1993, I didn't even know where to look for the stars. My childish unawareness made me take a much greater step than I could have ever imagined. Now, more than twenty years after I first set up my small, and very beautiful, refractor in my grandparents' kitchen, things have changed. I can finally say to myself that I have completed the very long path that I began as an ingenuous dreamer, and have finished as an amateur astronomer. It took me almost twenty years to learn what I know about the night sky, and this is the reason that I wrote a book: to help other enthusiastic young people to avoid waiting so long to knowledgably, and satisfactorily, observe the wonders of the Universe. Partly autobiographical and often ironic, we'll go on to the discovery of amateur astronomy and the magnificent Universe that is right above our heads. We will learn how to recognize the constellation, how to use a binoculars and how to choose our first, awesome telescope. We will learn to observe the extraordinary beauty of our Universe, from the planets till the distant galaxies. Let's start the most amazing and funny training of our lives and get ready to explore, with our telescope, the most astonishing place we will ever see: our Universe.

Socially Symbolic Acts - Joseph Francese 2006

This book discusses issues of broad cultural consequence by examining the work of three of Italy's most prominent living novelists, Umberto Eco, Vincenzo Consolo, and Antonio Tabucchi. The introductory chapter continues a discussion of some of the topics already broached in the author's *Narrating Postmodern Time and Space* (1997). It uses an approach that is both historicist and psychoanalytic to critically address topics in cultural studies and Italian studies. The book deals with fictions of very recent publication, many of which have been published after the turn of the millennium, filling important gaps in the critical bibliography. Close readings relate texts to their historical and cultural contexts, critiquing their ideology while preserving their Utopian moments.

Copernicus Banned - Natacha Fabbri 2018

This book sheds light on various philosophical, theological, political and cultural aspects of the discussions that arose around the 'temerity' of Copernicanism and that eventually led to its prohibition by the Church.

Six Memos for the Next Millennium - Italo Calvino 2013-04-04

Italo Calvino was due to deliver the Charles Eliot Norton lectures at Harvard in 1985-86, but they were left unfinished at his death. The surviving drafts explore of the concepts of Lightness, Quickness, Multiplicity, Exactitude and Visibility (Constancy was to be the sixth) in serious yet playful essays that reveal Calvino's debt to the comic strip and the folktale. With his customary imagination and grace, he sought to define the virtues of the great literature of the past in order to shape the values of the future. This collection is a brilliant précis of the work of a great writer whose legacy will endure through the millennium he addressed. Italo Calvino, one of Italy's finest postwar writers, has delighted readers around the world with his deceptively simple, fable-like stories. Calvino was born in Cuba in 1923 and raised in San Remo, Italy; he fought for the Italian Resistance from 1943-45. His major works include *Cosmicomics* (1968), *Invisible Cities* (1972), and *If on a winter's night a traveler* (1979). He died in Siena in 1985, of a brain hemorrhage.

The Cambridge Concise History of Astronomy - Michael Hoskin 1999-03-18

Astronomy is one of the oldest sciences, and one which has repeatedly led to fundamental changes in our view of the world. This book covers the history of our study of the cosmos from prehistory through to a survey of modern astronomy and astrophysics (sure to be of interest to future historians of twentieth-century astronomy). It does not attempt to cover everything, but deliberately concentrates on the important themes and topics. These include stellar astronomy in the seventeenth and eighteenth centuries, at the time subordinate to the study of the solar system, but the source of many important concepts in modern astronomy, and the Copernican revolution, which led to the challenge of ancient authorities in many areas, not just astronomy. This is an essential text for students of the history of science and for students of astronomy who require a historical background to their studies.

The Confessions Of A Concubine - Roberta Mezzabarba 2021-12-31

One day you will be happy, but first life will teach you how to be strongA powerful novel, charged with strong emotions, with a cadenced rhythm. A story of domestic violence, of psychological abuse that will grab you in the gut. Mysia, a young woman, and her monochromatic life that step by step will become increasingly tinged with black, a black that knows sadness, fear, mourning. And in an escalation of violence, when the situation seems to become irreparable, impossible to bear, it will seem as if there is only one solution... But life is sometimes able to surprise us, and although this will not represent a fair reward for the wrongs suffered, perhaps over time it will be able to mitigate the memories, cushioning sharp edges and opening an un hoped-for glimmer of light. Every one of us deserves a life in color, deserves to finally be the architect of our own destiny, without succumbing any longer, to finally be free to love, to love each other.

Space 2.0 - Rod Pyle 2019-02-26

We're on the cusp of new era in the great adventure of space exploration. More than a half-century ago, humanity first hurled objects into space, and almost 50 years ago, astronauts first walked on the moon. Since then, we have explored Earth's orbit with shuttles, capsules, and space stations; sent robots to Mars, Venus, Mercury, Jupiter, Saturn, and Uranus; sampled a comet; sent telescopes into orbit; and charted most of our own planet. What does the future hold? In *Space 2.0*, space historian Rod Pyle, in collaboration with the National Space Society, will give you an inside look at the next few decades of spaceflight and long-term plans for exploration, utilization, and settlement. No longer the exclusive domain of government entities such as NASA and other national agencies, space exploration is rapidly becoming privatized, with entrepreneurial startups building huge rocket boosters, satellites, rocket engines, asteroid probes, prospecting craft, and even commercial lunar cargo landers to open this new frontier. Research into ever more sophisticated propulsion and life support systems will soon enable the journey to Mars and destinations deeper in our solar system. As these technologies continue to move forward, there are virtually no limits to human spaceflight and robotic exploration. While the world has waited since the Apollo lunar program for the next "giant leap," these critical innovations, most of which are within our grasp with today's technology, will change the way we live, both in space and on Earth. A new space age—and with it, a new age of peace and prosperity on Earth, and settlement beyond our planet—can be ours. Speaking with key leaders of the latest space programs and innovations, Pyle shares the excitement and promise of this new era of exploration and economic development. From NASA and the Russian space agency Roscosmos, to emerging leaders in the private sector such as SpaceX, Blue Origin, Moon Express, Virgin Galactic, and many others, *Space 2.0* examines the new partnerships that are revolutionizing spaceflight and changing the way we reach for the stars.

Soumchi - Amos Oz 2012-08-21

A tale of "dazzling brilliance . . . a simple story which conveys boundless meanings both modest and diverse, set in Jerusalem directly after WWII" (Historical Novel Society). When Soumchi, an eleven-year-old boy growing up in British-occupied Jerusalem just after World War II, receives a bicycle as a gift from his Uncle Zemach, he is overjoyed—even if it is a girl's bicycle. Ignoring the taunts of other boys in his neighborhood, he dreams of riding far away from them, out of the city and across the desert, toward the heart of Africa. But first he wants to show his new prize to his friend Aldo. In the tradition of such memorable characters as Huckleberry Finn and Holden Caulfield, Amos Oz's Soumchi is fresh, funny, and always engaging. "What a difference spirit and talent make! . . . told . . . with zest and buoyant humor, from the dual viewpoint of the alternately crushed and elated Soumchi and the amused author who delights in his boyhood excesses." —Kirkus Reviews "Oz shows a remarkable ability to stay true to his character and expand him fully into a multi-faceted jewel. Soumchi is a concise read which enhances each person's view on life, possessions, and how tender life and far-reaching imagination can be at such a sensitive age." —Historical Novel Society

Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition - Dina Di Giacomo 2019-03-01

Recently, technology and aging have been key research areas in human cognition. The Research Topic "Digital Skills and Life-long Learning: Digital Learning as a New Insight of Enhanced Learning by the Innovative Approach Joining Technology and Cognition" investigated technology's impact on cognitive and intellectual processes, highlighting how intensively technology can change and/or enhance the cognitive functioning throughout one's lifespan. The aim of this Research Topic was to provide an outlook through multidisciplinary research and development while addressing the dynamic intersection of cognition, mind, and technology. Our scope was 1) to favor the cognitive technology debate, 2) to overcome the dichotomies of technology and psychology, 3) to emphasize the advances in knowledge and well-being. This Research Topic comprises review studies and original articles, focused on digital skills that enhance human potential. Transversal approaches and cross-sectorial analysis were encouraged, leading to investigation areas related to cognitive and mental processing—in educational, rehabilitation, clinical settings—across aging. Articles of high relevance to the Research Topic were submitted on the subjects of a) research in human performance and human factors, b) new research and technologies addressing the needs of a growing populace, and c) cognitive aging and cognitive rehabilitation research.
