Cultural Heritage in a Changing World - Karol Jan Borowiecki 2016-05-02

The central purpose of this collection of essays is to make a creative addition to the debates surrounding the cultural heritage domain. In the 21st century the world faces epochal changes which affect every part of society, including the arenas in which cultural heritage is made, held, collected, curated, exhibited, or simply exists. The book is about these changes; about the decentring of culture and cultural heritage away from institutional structures towards the individual; about the questions which the advent of digital technologies is demanding that we ask and answer in relation to how we understand, collect and make available Europe's cultural heritage. Cultural heritage has enormous potential in terms of its contribution to improving the quality of life for people, understanding the past, assisting territorial cohesion, driving economic growth, opening up employment opportunities and supporting wider developments such as improvements in education and in artistic careers. Given that spectrum of possible benefits to society, the range of studies that follow here are intended to be a resource and stimulus to help inform not just professionals in the sector but all those with an interest in cultural heritage.

His Reluctant Omega - L. C. Davis 2017-01-28

Mitchell is an alpha among alphas in the brutal Mountain Ridge Pack. He rules with equal parts fear and respect, but his pack is growing restless after decades without an heir to his proverbial throne. Only an alpha and an omega pair can sire another alpha to lead the pack, but Mitchell's not-so-secret shame is the fact that he hasn't been able to impregnate any of his female omegas. Unlike the other weaker packs, the Mountain Ridge wolves have always kept their omegas in line and at a safe distance through the infamous yet efficient Breeding Program. On the recommendation of an old rival turned tentative friend, Mitchell decides to try his hand--among other things--in a last-ditch effort at siring an heir with a rare male omega. When a transfer request for one of the only male omegas in the pack uncovers unspeakable abuse and corruption within the Breeding Program, the very future of the pack is thrown into question. -Angel's heart has turned to stone after a lifetime of abuse at the hands of the alpha shifters who oversee the Breeding Program in his pack unit. The only love he has left belongs to the three other omegas he shares his little corner of hell with. Angel will do whatever it takes to protect them, even if it means becoming the mate of the top alpha himself. Angel knows better than to believe the gruff Mitchell when he claims that he's not like the others. Despite his best attempts to steel himself against the strange bond that forms between them, Angel discovers that Mitchell is the most dangerous alpha of all because he wants the one thing Angel has sworn never to give--his heart. With war looming on the horizon, a pack in chaos and two hardened hearts melted by an unlikely spark of love, only one outcome is certain. The Mountain Ridge Pack will never be the same. Disclaimer: See inside cover for content warnings. This is the second book in The Mountain Shifters series. Reading His Unclaimed Omega may provide context, but this book can be read as a standalone.

After Modernist Painting - Craig Staff 2013-03-14

Painting has often been declared dead since the 1960s and yet it refuses to die. Even the status and continued legitimacy of the medium has been repeatedly placed in question. As such, painting has had to continually redefine its own parameters and re-negotiate for itself a critical position within a broader, more discursive set of discourses. Taking the American Clement Greenberg's 'Modernist Painting' as a point of departure, *After Modernist Painting* will be both a historical survey and a critical re-evaluation of the contested and contingent nature of the medium of painting over the last 50 years. Presenting the first critical account of painting, rather than art generally, this book provides a timely exploration of what has remained a persistent and protean medium. Craig Staff focuses on certain developments including the relationship of painting to Conceptual Art and Minimalism, the pronouncement of paintings alleged death, its response to Installation Art's foregrounding of site, how it was able to interpret ideas around appropriation, simulation and hybridity and how today painting can be understood as both imaging and imagining the digital. *After Modernist Painting* is an invaluable resource for those seeking to understand the themes and issues that have pertained to painting within the context of postmodernism and contemporary artistic practice.

The Anatomy of Sheds - Jane Field-Lewis 2016-10-01

Sheds are no longer neglected buildings at the end of the garden. As shown in this book, they have become an area of our home to be discovered by creative designers who see the garden as an extendable

space of the home, whether in the heart of the city or in a larger rural setting. Today's sheds are stylish, innovative and elegant and can be used for a multitude of purposes. They can be artists' studios, writers' retreats, children's playgrounds or teenage dens, entertaining spaces, log cabins or garden rooms, or even just a traditional humble shed used for storage and plants but revamped with more stylish and decorated overtones. Using over 50 real examples from around the world, some simple and modest and some really extravagant, this book helps inspire and instruct the reader on how to create your own special space. The owners themselves describe how they have created their own private hideaways and Jane Field-Lewis provides insightful style notes and comments based on her conversations with the owners, architects and designers. She tells you how to create your shed depending on how you want to use it, and then how to make it stylish as well as useful. An intrinsic part of their charm is that normal decorating rules don't apply and this gives the owners the freedom to express themselves in a different way without necessarily following any fashion or trends. Recycled, vintage and precious items are mixed with new, functional and practical ones. Jane Field-Lewis covers all these aspects in a warm-hearted way. The stunning photographs are accompanied by informative captions to help the reader design and decorate their shed on a more practical level. This is the book to help you create an inspiring space. Nuer Time-Reckoning -

The Anthropology of Time - Alfred Gell 2021-03-10

Time - relentless, ever-present but intangible and the single element over which human beings have no absolute control - has long proved a puzzle. The author examines the phenomenon of time and asks such fascinating questions as how time impinges on people, to what extent our awareness of time is culturally conditioned, how societies deal with temporal problems and whether time can be considered a 'resource' to be economized. More specifically, he provides a consistent and detailed analysis of theories put forward by a number of thinkers such as Durkheim, Evans-Pritchard, Lévi-Strauss, Geertz, Piaget, Husserl and Bourdieu. His discussion encompasses four main approaches in time research, namely developmental psychology, symbolic anthropology (covering the bulk of post-Durkheimian social anthropology) 'economic' theories of time in social geography and, finally, phenomenological theories. The author concludes by presenting his own model of social/cognitive time, in the light of these critical discussions of the literature.
