Motivational Interviewing for Clinical Practice - Petros Levounis 2017-01-06

Motivational Interviewing for Clinical Practice teaches the reader how to use the critically important tool of motivational interviewing to promote health and well-being. Based on the theoretical framework of Miller and Rollnick, the book presents the latest models and techniques that the editors and authors have found helpful in their scholarship and clinical experience. Failure to adhere to recommended treatments is common across a wide range of illnesses -- from medical problems, such as hypertension or management of cardiovascular risk factors, to psychiatric disorders, including addiction. The methods and skills of motivational interviewing can be applied to any health behavior, be it giving up alcohol or cigarettes, taking medication for hypertension or high

cholesterol, or changing dietary and exercise habits. *Motivational Interviewing for Clinical Practice* has many useful features: The book is organized along the four processes of motivational interviewing -- engaging, focusing, evoking, and planning -- which provides a consistent framework for enhanced understanding. The authors include numerous case examples with extensive illustrations of clinical dialogue that will be invaluable to both novices and experts. The book explores the integration of motivational interviewing with other psychotherapies and the use of motivational interviewing with psychopharmacology. The authors also address special topics such as motivational interviewing in a diverse society and the teaching of motivational interviewing. Key points, references, and multiple-choice examination questions, along with explanations of the correct answers, are provided, as well as numerous clinical tools and

summary tables to bring the material to life. For those looking for a quick general or board review on the topic, the multiple choice questions and answers are collected together in a special section for easy access, self-study, and review. Medical students new to motivational interviewing provide reflections on each chapter, focusing readers on the material deemed by their peers to be most useful to them in the future.
